Re: Main Street Villas

Dear Mr. Jeffrey Michael Meyer:

The subject property, known as Main Street Villas, is a proposed affordable multifamily development to be located at 1312 E Main Street in Lebanon, Russell County, Virginia. The subject property is proposed to consist of 21 revenue-producing units to be constructed with an allocation of tax credits. The subject property is a 62+ age restricted community.

The subject property is proposed to consist of 21 revenue-producing units including 1-bedroom garden apartments and duplex units. A total of 5 units are proposed to be income restricted to 30% of AMI; a total of 6 units are proposed to be income restricted to 50% of AMI; a total of 10 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; a total of 21 units are proposed to benefit from project-based rental assistance; no units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed allocation of tax credits will run for the next 30 years.

The scope of this assignment consists of a comprehensive market analysis for the subject property. The market study was completed in accordance with Virginia Housing, National Council for Housing Market Analyst (NCHMA) guidelines and the Uniform Standards of Professional Practice (USPAP). The completion of this report involved a site visit, interviews with local property managers, and the collection of market data through discussions with persons knowledgeable of the local real estate market.

The purpose, intended use, and function of the report is to assess the marketability of the subject property for investment underwriting purposes. This report should not be used for any other purposes without the express written permission of Allen & Associates Consulting.

The report has been generated for the benefit of our client VCDC. No other person or entity may use the report for any reason whatsoever without our express written permission.

A summary of our findings and conclusions is found in the following pages. The conclusions reported are based on the conditions that exist as of the effective date of this report. These factors are subject to change and may alter, or otherwise affect the findings and conclusions presented in this report.

To the best of our knowledge, this report presents an accurate evaluation of market conditions for the subject property as of the effective date of this report. While the analysis that follows is based upon information obtained from sources believed to be reliable, no guarantee is made of its accuracy.

Feel free to contact us with any questions or comments.

Respectfully submitted:

## EXECUTIVE SUMMARY

The following is a summary of our key findings and conclusions with respect to the subject property:

### Project Description

The subject property, known as Main Street Villas, is a proposed affordable multifamily development to be located at 1312 E Main Street in Lebanon, Russell County, Virginia. The subject property is proposed to consist of 21 revenue-producing units to be constructed with an allocation of tax credits. The subject property is a 62+ age restricted community.

### Proposed Unit Mix

The subject property is proposed to consist of 21 revenue-producing units including 1-bedroom garden apartments and duplex units. A total of 5 units are proposed to be income restricted to 30% of AMI; a total of 6 units are proposed to be income restricted to 50% of AMI; a total of 10 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; a total of 21 units are proposed to benefit from project-based rental assistance; no units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed allocation of tax credits will run for the next 30 years.

Unit Type / Income Limit / Rent Limit	Proposed Unit Configuration		Units	Gross Rent	UA	Net Rent
	HOME	Subsidized				
1BR-1BA-853sf / 30% of AMI / 30% of AMI	No	Yes	3	\$714	\$105	\$609
1BR-1BA-658sf / 30% of AMI / 30% of AMI	No	Yes	2	\$714	\$105	\$609
1BR-1BA-658sf / 50% of AMI / 50% of AMI	No	Yes	6	\$714	\$105	\$609
1BR-1BA-658sf / 60% of AMI / 60% of AMI	No	Yes	10	\$714	\$105	\$609
Total/Average			21	\$714	\$105	\$609

### Site Description

The subject property includes an irregular-shaped parcel consisting of approximately 3.3 acres and approximately 600 feet of road frontage.

A total of 53 parking spaces are planned for this development (48 regular / 5 accessible / 2.52 spaces per unit). Privately-owned parking areas are planned for the subject property. We normally see 1.5 to 2.0 spaces per unit for projects like the subject. Public transportation is not found in the immediate area. In our opinion, the current parking appears

### Additional Considerations:

Zoning	Commercial. Legal, conditional use.
Environmental	New construction. No suspected environmental conditions.
Topography	No issues detected.
Flood	Zone X. Outside the 100-year flood zone.
DDA Status	Russell County, Virginia. Not designated as a Difficult to Develop Area.
QCT Status	Tract 304.01. Not designated as a Qualified Census Tract.
Access	Very Good. Located near a heavily-traveled road.
Visibility	Very Good. Significant traffic and frontage.

In our opinion, the site is suitable for development.

### Neighborhood Description

In our opinion, the subject property has a very good location relative to competing properties with respect to neighborhood characteristics.

Additional Considerations:

Crime	Similar to market average.
Schools	Similar to market average.
Average Commute	Longer than market average.

In our opinion, the neighborhood is suitable for development.

Primary Market Area

We defined the primary market area by generating a 30-minute drive time zone around the subject property. We also considered existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

The primary market area includes a population of 49,051 persons and covers a total of 589.7 square miles, making it 27.4 miles across on average.

We estimate that up to 40 percent of demand will come from areas outside of the primary market area.

Demographic Characteristics

We anticipate moderate population and household growth for the market area. Renter households are anticipated to increase modestly as well. Finally, we anticipate that rents will grow with CPI over the next few years. Additional details follow:

Population	Market area population currently stands at 48,962 and is projected to grow 0.2 percent this year.
Households	Market area households currently stand at 21,019 and is projected to decline 0.2 percent this year.
Renter Households	Market area renter households currently stand at 5,843 and is projected to decline 0.2 percent this year.
Renter Tenure	Market area renter tenure currently stands at 27.8 percent.
Rent Growth	Market area rents have grown 4.67% annually since 2010.

Regional Economic Outlook

We anticipate moderate economic growth for the region. Additional details follow:

Est Employment	Regional establishment employment currently stands at 10,176 and is projected to grow 1.4 percent this year.
Civ Employment	Regional civilian employment currently stands at 9,027 and is projected to decline 0.3 percent this year.
Empl by Industry	Regional establishment employment currently stands at 10,244. The data suggests that State and Local Government is the largest employment category accounting for 14.4% of total regional employment. Health Care and Social Assistance is the second largest category accounting for 10.6% of total employment. Retail Trade is the third largest category accounting for 9.8% of total employment. Professional and Technical Services is the fourth largest category accounting for 8.7% of total employment. Farm Employment is the fifth largest category accounting for 8.3% of total employment.
Top Employers	The top employers include: (1) Food City Distribution Ctr (1001 employees); (2) Clinch Valley Health (700 employees) and; (3) Clinch Valley Med Ctr Senior (700 employees).

Supply Analysis

Our analysis includes a total of 63 confirmed market area properties consisting of 2,443 units. The occupancy rate for these units currently stands at 92 percent. This rate reflects the occupancy for all confirmed market area units, regardless of project status (stabilized, under construction, proposed, etc.).

The following tables summarize our findings for this market area:

Grand Total				
Project Type	Properties	Units	Vacant	Occupancy
Market Rate	34	1,016	45	96%
Restricted	15	459	82	82%
Subsidized	14	968	60	94%
Total	63	2,443	187	92%

Stabilized				
Family				
Project Type	Properties	Units	Vacant	Occupancy
Market Rate	34	1,016	45	96%

### Most Comparable Properties

An overview of the market rate comparables selected for purposes of our analysis follows. The properties we consider to be the best comparables are highlighted for the reader's reference.

Key	Property	Units	Occupancy	Built	Renovated	Rents	Type	Miles to Sub
015	Cedar Ridge Apartments	39	95%	1984	2020	Market Rate	Family	13.46
055	Mountain Empire Apartments	48	100%	1990	na	Market Rate	Family	13.17
067	Promise Landing Apartments	64	98%	1990	na	Market Rate	Family	13.30
096	Whites Mill Road Apartments	16	94%	1996	na	Market Rate	Family	11.39
097	Willow Run Apartments	192	100%	2009	na	Market Rate	Family	12.58

An overview of the restricted rent comparables selected for purposes of our analysis follows. The properties we consider to be the best comparables are highlighted for the reader's reference.

Key	Property	Units	Occupancy	Built	Renovated	Rents	Type	Miles to Sub
012	Bristol Residential	41	80%	1925	2006	Restricted	Elderly	18.09
024	Eastridge Apartments	96	98%	1970	2008	Restricted	Family	18.38
037	Highland View Apartments	44	98%	1983	2013	Restricted	Family	12.21
071	Ridgefield Court Apartments	48	90%	1987	2021	Restricted	Family	12.29
073	Sapling Grove Apartments	26	100%	2008	na	Restricted	Family	18.37

### Achievable Rents

In the following table we present our concluded achievable rents and rent advantage for the subject property:

Unit Type / Income Limit / Rent Limit	Achievable Rents			Units	Achievable	Proposed	Advantage
	HOME	Subsidized					
1BR-1BA-853sf / 30% of AMI / 30% of AMI	No	Yes		3	\$1,150	\$609	47.0%
1BR-1BA-658sf / 30% of AMI / 30% of AMI	No	Yes		2	\$1,150	\$609	47.0%
1BR-1BA-658sf / 50% of AMI / 50% of AMI	No	Yes		6	\$1,150	\$609	47.0%
1BR-1BA-658sf / 60% of AMI / 60% of AMI	No	Yes		10	\$1,150	\$609	47.0%
Total / Average				21	\$1,150	\$609	47.0%

Our analysis suggests an average achievable rent of \$1,150 for the subject property. This is compared with an average proposed rent of \$609, yielding an achievable rent advantage of 47 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

### NCHMA Demand Analysis

In the following tables we present our concluded demand, capture rate, penetration rate and absorption period estimates for the subject property using the NCHMA demand methodology:

Unit Type / Rent Type / Income Limit	Vac Units at Market Entry	Gross Demand	Vacant & Pipeline Units	Capture Rate Gross	Capture Rate Net	Penetration Rate	Absorption Pd (Mos)
1-Bedroom / Subsidized / 60% of AMI	21	984	23	2.1%	2.2%	21.8%	3
				Project-Wide Gross Capture Rate	2.1%		
				Project-Wide Net Capture Rate	2.2%		
				Project-Wide Penetration Rate	21.8%		
				Stabilized Occupancy	97%		
				Project-Wide Absorption Period	3 mos		

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

Our analysis suggests that the subject property will stabilize at 97 percent occupancy. We estimate 3 months of absorption and an average absorption rate of 6.7 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

### Conclusion

In conclusion, the subject property appears to be feasible from a market standpoint. The units appear to be priced appropriately and we anticipate a rapid lease-up after construction.

Because of the demonstrated depth of demand in this area, we do not believe the construction of this property will have an adverse impact on existing projects in the market area.

## PROJECT OVERVIEW

### Project Description

The subject property, known as Main Street Villas, is a proposed affordable multifamily development to be located at 1312 E Main Street in Lebanon, Russell County, Virginia. The subject property is proposed to consist of 21 revenue-producing units to be constructed with an allocation of tax credits. The subject property is a 62+ age restricted community.

Select project details are summarized below:

Project Description	
Property Name	Main Street Villas
Street Number	1312
Street Name	E Main
Street Type	Street
City	Lebanon
County	Russell County
State	Virginia
Zip	24266
Units	21
Project Rent	Subsidized
Project Type	Elderly
Project Status	Prop Const
Financing Type	Tax Credit
Latitude	36.9040
Longitude	-82.0571

### Construction and Lease-Up Schedule

We anticipate a 12-month construction period for this project. Assuming a December 31, 2025 closing, this yields a date of completion of December 31, 2026. Our demand analysis (found later in this report) suggests a 3-month absorption period. This yields a date of stabilization of March 1, 2027.

### Unit Configuration

The subject property is proposed to consist of 21 revenue-producing units including 1-bedroom garden apartments and duplex units. A total of 5 units are proposed to be income restricted to 30% of AMI; a total of 6 units are proposed to be income restricted to 50% of AMI; a total of 10 units are proposed to be income restricted to 60% of AMI; no units are proposed to be set aside as market rate units; a total of 21 units are proposed to benefit from project-based rental assistance; no units are proposed to benefit from HOME financing. The rent and income restrictions associated with the proposed allocation of tax credits will run for the next 30 years.

Proposed Unit Configuration										
BR	BA	SF	Unit Type	Income Limit	Rent Limit	HOME Units	Subs Units	Total Units	Gross Rent	Net Rent
1	1.0	853	Garden/Flat	30%	30%	No	Yes	3	\$714	\$609

Source: HUD; State Housing Finance Agency

The income limits found above were based (in part) on HUD's published median household income for the area. The table below shows how this statistic has increased/decreased over the past several years:

Historical Median Income		
Year	\$	Change
2015	\$45,100	2.5%
2016	\$44,600	-1.1%
2017	\$50,000	12.1%
2018	\$50,600	1.2%
2019	\$55,500	9.7%
2020	\$56,000	0.9%
2021	\$53,300	-4.8%
2022	\$54,100	1.5%
2023	\$63,100	16.6%
2024	\$67,100	6.3%
2025	\$72,000	7.3%

Source: HUD

The subject property is operated subject to certain rent restrictions. The following table gives the maximum housing expense (net rent limit + tenant-paid utilities) for this area:

Maximum Housing Expense						
Unit Type	30% of AMI	40% of AMI	50% of AMI	60% of AMI	70% of AMI	80% of AMI
0 Bedroom	\$432	\$577	\$721	\$865	\$1,009	\$1,154
1 Bedroom	\$463	\$618	\$772	\$927	\$1,081	\$1,236
2 Bedroom	\$555	\$741	\$926	\$1,111	\$1,296	\$1,482
3 Bedroom	\$642	\$856	\$1,070	\$1,284	\$1,498	\$1,712
4 Bedroom	\$716	\$955	\$1,193	\$1,432	\$1,671	\$1,910

Source: HUD

The following table sets forth the gross fair market rents (net fair market rents + tenant-paid utilities) that would apply to any Section 8 voucher recipients or any units benefiting from HOME financing at the subject property:

Fair Market Rents	
Unit Type	Gross Rent
0 Bedroom	\$744
1 Bedroom	\$748
2 Bedroom	\$914
3 Bedroom	\$1,156
4 Bedroom	\$1,377

Source: HUD

## IMPROVEMENT DESCRIPTION & ANALYSIS

Our improvement analysis includes an evaluation of the following factors with respect to the subject property: (1) Building Features; (2) Unit Features; (3) Project Amenities, (4) Utility Configuration; and (5) Useful Life Analysis.

### **Building Features**

The subject property is proposed to consist of 21 revenue-producing units in 10 residential buildings and 0 non-residential buildings. The development is proposed to include approximately 14,403 square feet of net rentable area and 18,121 square feet of gross building area.

Additional information regarding the subject property's proposed major building systems is found below.

#### Foundation - Concrete Slab, Basements, Crawl Spaces, etc.

The subject property is proposed to include slab on grade foundations.

#### Structural Frame - Floor, Wall, Roof Structural Systems, etc.

The subject property is proposed to be constructed with wood frame surfaced with plywood. Floor/ceiling assemblies are proposed to consist of wood joists & plywood or concrete subfloors. Roof assemblies are proposed to consist of wood trusses & plywood sheathing.

#### Exterior Wall - Exterior Finishes, Doors, Windows, Exterior Stairs, etc.

The subject is proposed to include vinyl siding, double hung vinyl double pane windows, steel clad insulated six-panel unit entry doors, and steel clad insulated six-panel patio doors with glass panels.

#### Roof - Sheathing, Coverings, Warranties, Gutters & Downspouts, Soffit & Fascia, etc.

The subject is proposed to include gabled asphalt shingle roofs.

#### Vertical Transportation - Elevator, Interior Stair Systems

The subject property is a proposed 2-story development which is proposed to include 10 residential buildings with no elevators.

#### Plumbing - Sanitary, Storm, Sewer, Fixtures, Domestic Hot Water

Domestic water piping is proposed to be constructed of CPVC pipe and fittings. Wastewater lines consist of PVC pipe and fittings. Potable hot water is proposed to be supplied via individual electric hot water heaters.

#### HVAC - Heating, Air Conditioning, Ventilation

The subject property is proposed to include individual interior-mounted electric heat, individual exterior-mounted a/c compressors with interior-mounted air handlers.

#### Electrical and Communications - Distribution, Aluminum Wiring, etc.

Buildings are proposed to receive electrical power from exterior pad-mounted transformers. Electrical service to units is proposed to consist of 120/240V AC with 100 amps available for each panel. Electrical wiring is proposed to consist of copper. Properly grounded, three-prong outlets are proposed in each dwelling unit. The outlets located in the wet areas are proposed to be Ground Fault Circuit Interrupter (GFCI) outlets. Surface-mounted fluorescent & LED fixtures are proposed.

#### Fire Suppression

The subject property is proposed to be equipped with an NFPA-13 fully automatic fire suppression (sprinkler) system. In addition, hard-wired smoke detectors with battery backup are proposed in each bedroom area.

### **Unit Features**

The subject property is proposed to contain 21 revenue-producing units including 16 regular units and 5 accessible units, including 21 bedrooms, 21 full bathrooms and 0 half bathrooms.

Additional information regarding the subject property's proposed unit features is found below.

Walls / Ceilings / Interior Doors

Subject property units are proposed to include 8 foot ceilings, painted gypsum wallboard & ceilings, wood solid-core flat panel interior doors and wood solid-core flat panel closet doors.

Floor Covering

Floor covering is proposed to consist of luxury vinyl plank in the entryways, bathrooms, and kitchens along with luxury vinyl plank in the living areas and bedrooms.

Kitchens

Kitchens are proposed to include electric four-top ranges, range hoods, frost-free refrigerators, dishwashers, composite wood cabinets, laminated countertops and stainless steel sinks.

Bathrooms

Bathrooms are proposed to include composite wood vanities, cultured marble countertops, porcelain sinks & toilets, along with fiberglass tubs & surrounds.

**Project Amenities**

A discussion of the development's proposed project amenities is found below.

Site & Common Area Amenities

A business/computer center, community center, gazebo/patio, and herb garden are proposed for the subject property.

Parking

Open parking is proposed for the subject property.

Laundry

Washer/dryer units are proposed for the subject property.

Security

No security amenities are proposed for the subject property.

Services

No special services are proposed for the subject property.

Tables comparing the subject property's proposed amenities to that of the most comparable properties are found at the end of this section.

**Utility Configuration**

The subject property is proposed to include electric heat, electric cooking and electric hot water. All utilities - with the exception of trash - are proposed to be paid by the resident.

In the table that follows we compare the subject's proposed utility allowances (also known as tenant paid utilities) to the estimated allowances using the HUD Utility Schedule Model:

Utility Allowances										
BR	BA	SF	Unit Type	Inc Lmt	Rnt Lmt	HOME	Subs	Units	UA	HUD UA
1	1.0	853	Garden/Flat	30% of AMI	30% of AMI	No	Yes	3	\$105	\$117
1	1.0	658	Duplex	30% of AMI	30% of AMI	No	Yes	2	\$105	\$131
1	1.0	658	Duplex	50% of AMI	50% of AMI	No	Yes	6	\$105	\$131
1	1.0	658	Duplex	60% of AMI	60% of AMI	No	Yes	10	\$105	\$131
Total/Average								21	\$105	\$129

The HUD utility allowances are a good measure of the energy costs for a given property. Our analysis suggests that the proposed utility allowances are lower than those established using the HUD model.

Tables comparing the subject property's utility configuration to that of the most comparable properties are found at the end of this section. Outputs from the HUD Utility Schedule Model are also found there.

### Useful Life Analysis

We anticipate a useful/economic life of 50 years for this development, assuming that appropriate replacement reserves are established for this property.

In the course of completing this study, we rated the condition of the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). We also evaluated the actual and effective ages of the subject and select comparables. A table summarizing our findings is found below:

		Actual Age   Effective Age   Condition			Rank		
		Rating					
Key	Project Name	Actual Age	Effective Age	Property Condition	Actual Age	Effective Age	Property Condition
Sub	Main Street Villas	2025	2025	4.50	1	1	1
012	Bristol Residential	1925	1996	2.00	11	8	11
015	Cedar Ridge Apartments	1984	2010	2.50	8	3	9

## SITE DESCRIPTION & ANALYSIS

Our assessment of the site included an evaluation of the following factors with respect to the subject property: (1) Survey; (2) Site Plan; (3) Nuisances, Hazards, Detrimental Influences & Environmental; (4) Topography; (5) Flood Zone; (6) Difficult to Develop Area Status; (7) Qualified Census Tract Status; and (8) Traffic Patterns, Access & Visibility.

### Survey

A survey for the subject property was not provided to the analyst for review. Current surveys should be evaluated to ascertain whether there are any easements encumbering the subject property.

### Site Plan

A site plan for the subject property was provided to the analyst for review. Site plans are necessary to analyze the site improvements, parking configuration, internal traffic flow, location of building improvements and landscaping improvements for the subject property. Our review did not identify any problem areas with respect to the subject property. A summary of the development's site features is found below.

#### Acres / Lot Shape / Frontage

The subject property includes an irregular-shaped parcel consisting of approximately 3.3 acres and approximately 600 feet of road frontage.

#### Zoning

According to the sponsor, the subject property is currently zoned Commercial. It is our understanding that the current zoning for the subject is a legal, conforming use.

#### Parking / Streets / Curbs / Sidewalks

A total of 53 parking spaces are planned for this development (48 regular / 5 accessible / 2.52 spaces per unit). Privately-owned parking areas are planned for the subject property. We normally see 1.5 to 2.0 spaces per unit for projects like the subject. Public transportation is not found in the immediate area. In our opinion, the current parking appears adequate for the subject property.

#### Dumpsters / Dumpster Enclosures

The subject includes 2 publicly-owned dumpsters along with 2 privately-owned wood enclosures.

#### Landscaping / Perimeter Fence / Retaining Walls / Entry Sign

Trees, shrubs & lawns are found at the subject property. A perimeter fence is not found at the subject property. Retaining walls are not found at this property. One unlighted entry sign is found at this property.

#### Stormwater Management / Site Lighting / Water Service / Wastewater Service

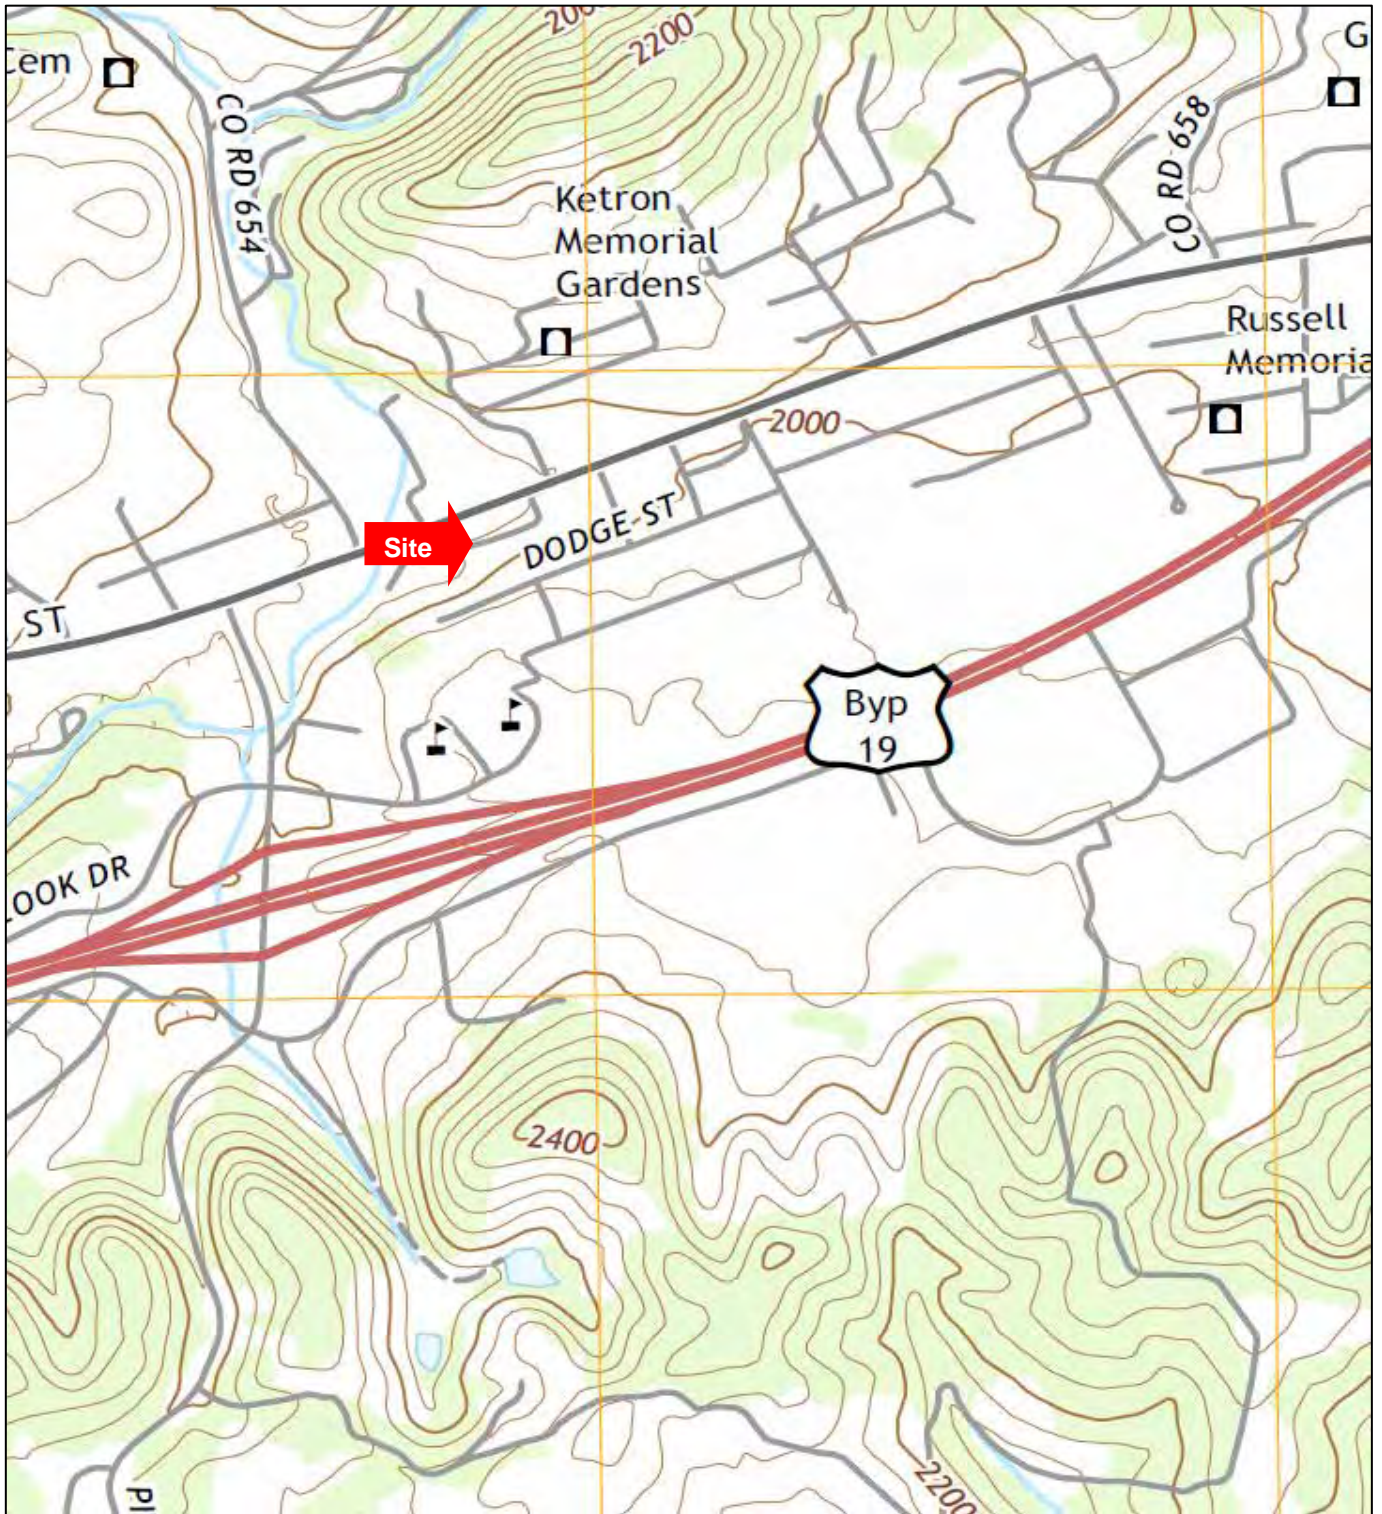

Stormwater management consists of catch basins and concrete pipe connecting to a public system. Site lighting consists of publicly-owned HID poles. Domestic water service to buildings consists of ductile iron pipe connecting to a public system. Wastewater service to buildings consists of PVC pipe connecting to a public system.

### Nuisances, Hazards, Detrimental Influences & Environmental

We did not observe any nuisances, hazards, detrimental influences or recognized environmental conditions on our inspection of the subject property. Nevertheless, we recommend that the sponsor obtain a comprehensive environmental assessment from a qualified professional.

## Topography

The USGS map showing the topography of the subject property and surrounding area is found below:

The topographic map shows that the site is flat and drains to adjacent properties to the north and west. In our opinion, there do not appear to be any topographic issues with respect to the subject property.

## Flood Zone

The map showing the location of the subject property relative to nearby areas prone to flooding (identified in purple) is found below:

 Report generated Feb 27, 2022 by jcarroll@allenadvisors.com Page 2 of 2

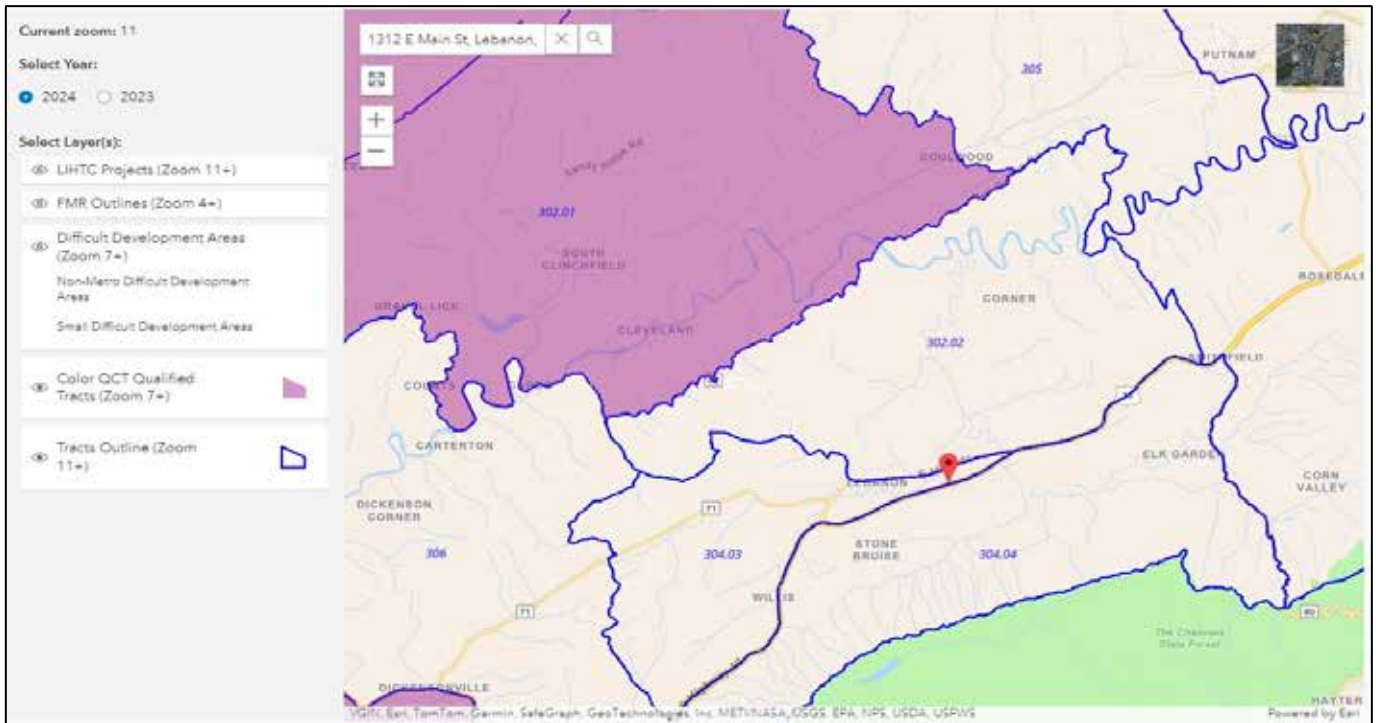

According to FEMA map number 51167C0245C dated September 29, 2010, the subject property is located in Zone X. This is an area that is identified as being located outside - but near - the 100-year flood zone.

## Difficult to Develop Area Status

The subject property is located in Russell County, Virginia - an area that is not designated as a Difficult to Develop Area. Consequently, the subject property does not appear to qualify for special DDA funding under state and federal programs.

## Qualified Census Tract Status

The federal government has identified census tracts throughout the United States that include high concentrations of low-income households and substandard housing units. These areas, known as Qualified Census Tracts, qualify for special funding under various state and federal programs. A QCT map showing the location of the subject property is found below:

The subject property is located in Census Tract 304.03 - an area that is not designated as a Qualified Census Tract. Consequently, the subject property does not appear to qualify for special QCT funding under state and federal programs.

## Traffic Patterns, Access & Visibility

A traffic map identifying the subject property is found below:

### Access

The subject property is located on E Main Street, approximately 2 blocks east of Pittston Road in Lebanon, Virginia. Main Street is a moderately-traveled east-west road carrying approximately 8,000 vehicles per day. Pittston Road is a moderately-traveled north-south road carrying approximately 9,500 vehicles per day. We did not observe any road or infrastructure improvements taking place in the immediate vicinity of the subject property. In our opinion, therefore, accessibility is very good by virtue of the location of the subject property relative to existing streets and thoroughfares.

### Visibility

The subject property is visible from Main Street with +/- 600 feet of frontage and a significant volume of drive-by traffic. Consequently, in our opinion visibility is very good by virtue of the exposure of the subject property to existing drive-by traffic volumes.

In the course of completing this study, we rated the access and visibility for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). A table summarizing our findings is found below:

Access & Visibility

Rating				Rank	
Key	Project Name	Access	Visibility	Access	Visibility

## NEIGHBORHOOD DESCRIPTION & ANALYSIS

### Neighborhood

Our assessment of the neighborhood includes an evaluation of the following factors with respect to the subject property: (1) Life Cycle; (2) Surrounding Properties; (3) Economic Characteristics; (4) Crime Rates; (5) Educational Attainment; and (6) Commuting Patterns.

#### Life Cycle

Neighborhoods are sometimes thought to evolve through four distinct stages:

- Growth – A period during which the area gains public favor and acceptance.
- Stability – A period of equilibrium without marked gains or losses.
- Decline – A period of diminishing demand.
- Revitalization – A period of renewal, redevelopment, modernization, and increasing demand.

Based on our evaluation of the neighborhood, the subject property is located in an area that appears to be in the stability stage of its life cycle. Modest population growth is anticipated for the next several years.

#### Surrounding Properties

The subject property is located in Lebanon, Virginia. The immediate area consists of residential land uses.

Commercial is located to the north; Residential is located to the south; Commercial is located to the east; and Commercial is located to the west of the subject property.

Surrounding property uses are summarized in the table found below:

Surrounding Properties		
Direction	Use	Condition
North	Commercial	Good
South	Residential	Good
East	Commercial	Good
West	Commercial	Good

Source: Allen & Associates

#### Economic Characteristics

The subject property is located in an area with average household incomes of \$45,139 (in constant 2015 dollars); this is compared with \$31,393 for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with median cash rents of \$516 (in constant 2015 dollars); this is compared with \$529 for the most comparable properties included in this analysis.

Finally, the subject property is located in an area with median single family home values of \$150,500 (in constant 2015 dollars); this is compared with \$129,291 for the most comparable properties included in this analysis.

#### Crime Rates

The subject property is located in an area with personal crime rates of 2.0%. Personal crime includes offenses such as rape, murder, robbery and assault. Our research suggests that the average personal crime rate for the most comparable properties stands at 2.2%.

In addition, the subject property is located in an area with property crime rates of 1.6%. Property crimes include offenses such as burglary, larceny and theft. Our research suggests that the average property crime rate for the most comparable properties stands at 3.3%.

Please note: The crime statistics included in this analysis are historical area-wide figures. These statistics make no consideration for changing demographics or the implementation of an affirmative crime prevention program at the subject property.

Educational Attainment

The subject property is located in an area with high school graduation rates of 82.5%; this is compared with 75.0% for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with college graduation rates of 18.5%; this is compared with 19.7% for the most comparable properties included in this analysis.

Commuting Patterns

The subject property is located in an area with an average drive to work of 24.4 minutes; this is compared with 20.0 minutes for the most comparable properties included in this analysis.

In addition, the subject property is located in an area with an average of 1.93 vehicles per household; this is compared with 1.42 vehicles per household for the most comparable properties included in this analysis.

Conclusion

In our opinion, the subject property has a very good location relative to competing properties with respect to neighborhood characteristics.

**Proximity to Area Amenities**

Our assessment included an evaluation of the proximity of various amenities to the subject and the most comparable properties. We looked at the following amenities in our analysis: (1) Banks; (2) Grocery; (3) Emergency Clinics; (4) Pharmacies; and (5) Discount Stores.

A listing of some of the area amenities is found below. An amenity map is found in the following pages:

Proximity to Area Amenities		
Amenity	Name	Miles
Bank	New Peoples Bank	0.0
Grocery	Food City	0.3
Emergency Clinic	Russell County Hospital	1.2
Pharmacy	Walgreens	0.2
Discount Store	Walmart	0.7

Source: Caliper Corporation

New Peoples Bank, Food City, Walgreens, and Walmart are all located less than 0.7 miles away from the subject property. Russell County Hospital is located 1.2 miles away.

Number of Area Amenities

We utilized the Caliper Corporation 2021 Point of Interest database to evaluate the subject and the most comparable properties with respect to the number of amenities in the immediate area.

- Caliper Corporation identified 9 banks within 2.0 miles of the subject property. The subject is ranked 7 out of the 11 properties included in this analysis.
- A total of 5 grocery stores are in the vicinity of the subject property. The subject is ranked 8 for the area.
- A total of 1 hospital is in the vicinity of the subject property. The subject is ranked 1 for the area.
- A total of 3 pharmacies are in the vicinity of the subject property. The subject is ranked 10 for the area.

- A total of 3 shopping establishments are in the vicinity of the subject property. The subject is ranked 1 for the area.

#### Nearest Area Amenities

We utilized the Caliper Corporation 2021 Point of Interest database to evaluate the subject and the most comparable properties with respect to the nearest area amenities.

- According to Caliper Corporation, the nearest bank is 0 miles away from the subject property. The subject is ranked 1 out of the 11 properties included in this analysis.
- The nearest grocery store is 0.3 miles away from the subject property. The subject is ranked 3 for the area.
- The nearest hospital is 1.2 miles away from the subject property. The subject is ranked 4 for the area.
- The nearest pharmacy is 0.2 miles away from the subject property. The subject is ranked 2 for the area.
- The nearest shopping center is 0.7 miles away from the subject property. The subject is ranked 4 for the area.

#### Conclusion

In our opinion, the subject property has a very good location relative to competing properties with respect to area amenities.

Tables comparing the subject property's proximity to area amenities to that of the most comparable properties is found on the next page. Maps showing the proximity of the subject property to area amenities and area employers is also found in the following pages.

In the course of completing this study, we rated the neighborhood and the proximity to area amenities for the subject property and the most comparable properties on a 1-5 scale (1 being the worst and 5 being the best). The tables on the following pages give these ratings.

Neighborhood Ratings

		Rating									Rank (1 = Property with Highest Rating)									Final Rating (1-5 Scale)

# MARKET AREA

## Overview

Market areas are influenced by a variety of interrelated factors. These factors include site location, economic, and demographic characteristics (tenure, income, rent levels, etc.), local transportation patterns, physical boundaries (rivers, streams, topography, etc.), census geographies, and the location of comparable and/or potentially competing communities.

In areas where the county seat is the largest city, centrally located, and draws from the entire county, the county may be the market area. In the case where there are potentially competing communities in one county, the market area may be part of the county. In fact, the market area could include portions of adjacent counties. In this case, a combination of county subdivisions may be used to define the market area. In urban or suburban areas, the market area will be adjacent to the site extending to all locations of similar character with residents or potential residents likely to be interested in the project. In this case, county subdivisions, townships, or a combination of census tracts may be used to define the market area.

Allen & Associates recently conducted a series of property management interviews to better understand market areas and resident moving patterns for multifamily properties. Our study suggested that markets may be classified into the following general categories: urban, suburban and rural. Renters in urban markets are typically willing to move 5 to 10 minutes when looking for a new apartment. Our research also shows that renters in suburban markets are normally willing to move 10 to 15 minutes when looking for a new place to live. Renters in rural markets are typically willing to move 15 to 20 minutes when looking for a new apartment. We considered these general guidelines in our evaluation of the subject property.

Our study suggested that secondary market areas were generally a function of whether the proposed development was family or elderly. Our research suggested that secondary market demand for family properties ranged from 10 to 30 percent. Secondary market demand for elderly properties ranged from 10 to 50 percent. Although seniors move less frequently than younger renters, they are often willing to move longer distances when looking for housing. We considered these general secondary market guidelines in our evaluation of the subject property.

Our primary and secondary market area definitions are found below.

## Primary Market Area

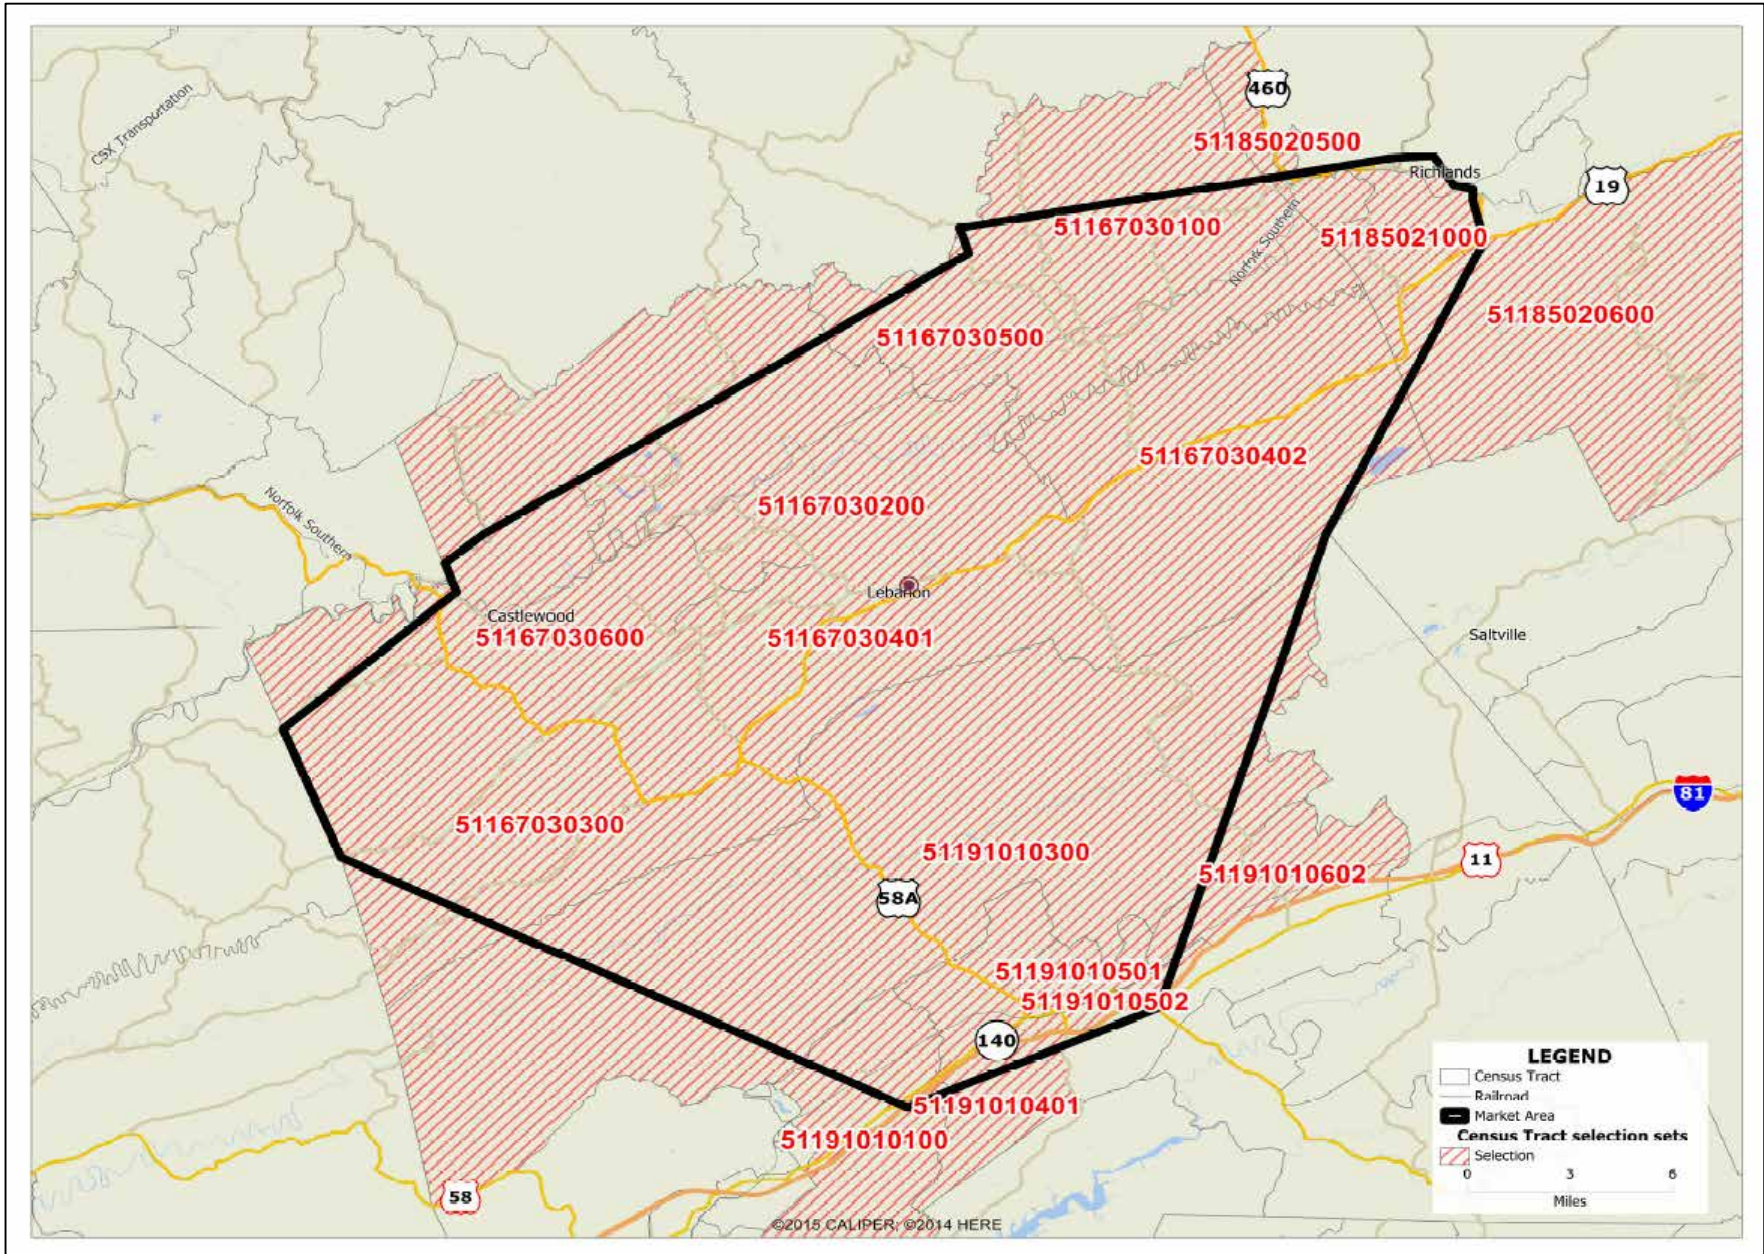

We defined the primary market area by generating a 30-minute drive time zone around the subject property. We also considered existing concentrations of multifamily properties and the nearest census tract boundaries in our analysis.

The primary market area includes a population of 49,051 persons and covers a total of 589.7 square miles, making it 27.4 miles across on average.

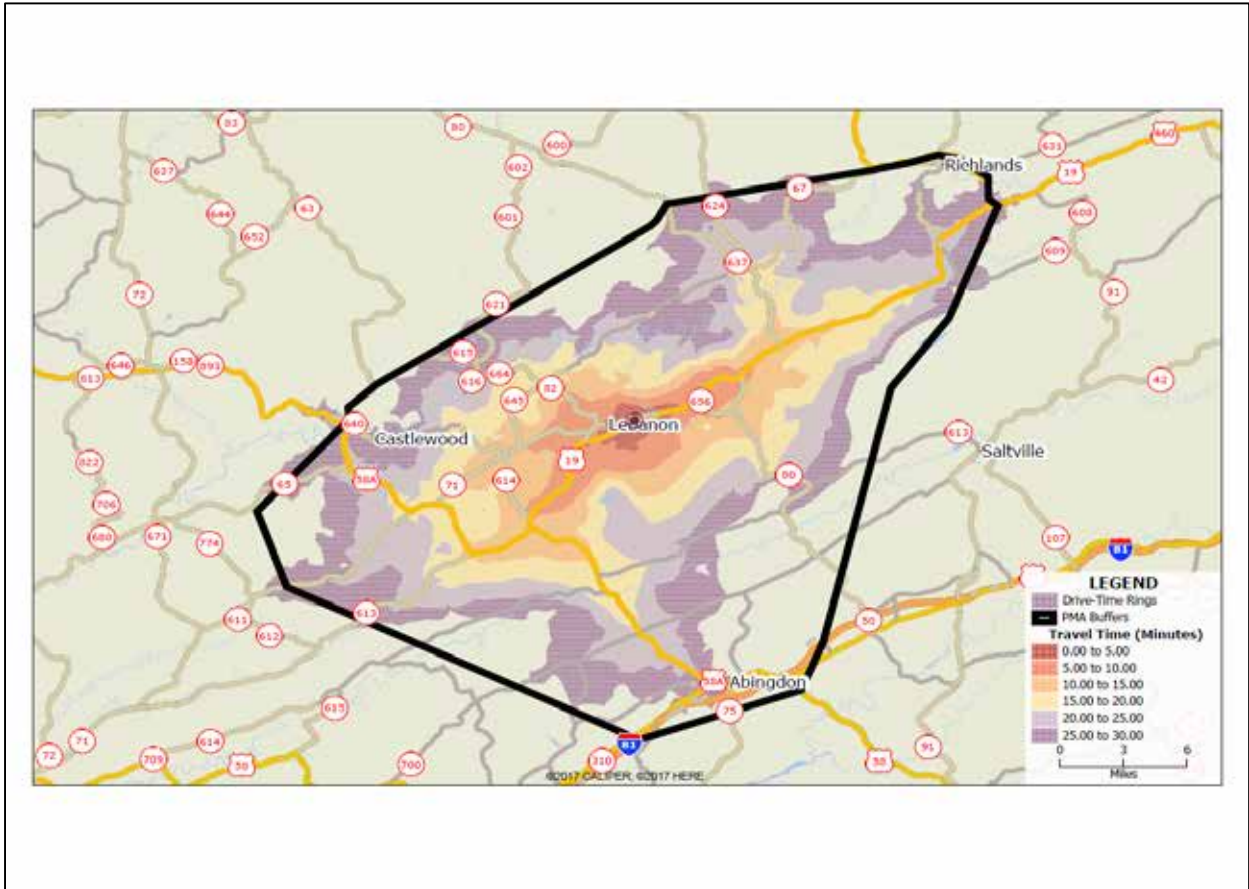

## Secondary Market Area

We estimate that up to 40 percent of demand will come from areas outside of the primary market area.

## ECONOMIC OUTLOOK

In this section we conduct an analysis of the regional economy. For purposes of our analysis, we define the region as Russell County, Virginia. A map depicting the Region is found below.

## Employment by Industry

The Bureau of Labor Statistics (BLS) tracks establishment employment by major industry. In the table below we present the current breakdown and percent distribution. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Establishment Employment			
Industry	Region	Reg %	US %
Farm Employment	847	8.3%	1.2%
Forestry, Fishing, Related Activities And Other Employment	84	0.8%	0.4%
Mining Employment	280	2.7%	0.5%
Utilities Employment	17	0.2%	0.3%
Construction Employment	739	7.2%	5.3%
Manufacturing Employment	564	5.5%	6.2%
Wholesale Trade Employment	155	1.5%	3.0%
Retail Trade Employment	1,001	9.8%	8.7%
Transportation And Warehousing Employment	310	3.0%	4.7%
Information Employment	48	0.5%	1.6%
Finance And Insurance Employment	402	3.9%	5.6%
Real Estate And Rental And Lease Employment	235	2.3%	5.2%
Professional And Technical Services Employment	889	8.7%	7.6%
Management Of Companies And Enterprises Employment	21	0.2%	1.4%
Administrative And Waste Services Employment	633	6.2%	6.4%
Educational Services Employment	80	0.8%	2.7%
Health Care And Social Assistance Employment	1,081	10.6%	11.9%
Arts, Entertainment, And Recreation Employment	47	0.5%	2.4%
Accommodation And Food Services Employment	544	5.3%	7.8%
Other Services, Except Public Administration Employment	655	6.4%	5.7%
Federal Civilian Government Employment	63	0.6%	1.3%
Federal Military Employment	77	0.8%	0.9%
State And Local Government Employment	1,472	14.4%	9.4%
Establishment Employment	10,244	100.0%	100.0%

Source: W&P Economics

Regional establishment employment currently stands at 10,244. The data suggests that State and Local Government is the largest employment category accounting for 14.4% of total regional employment. Health Care and Social Assistance is the second largest category accounting for 10.6% of total employment. Retail Trade is the third largest category accounting for 9.8% of total employment. Professional and Technical Services is the fourth largest category accounting for 8.7% of total employment. Farm Employment is the fifth largest category accounting for 8.3% of total employment.

Economists generally classify employment two ways: basic and non-basic. Basic employment, which is considered to be the engine of a local economy, includes industries that rely on external factors to fuel demand. For instance, mining, logging and manufacturers are frequently considered basic employers. Goods for these industries are shipped outside the location where they are produced. Non-basic employers depend largely on local demand and usually employ local workers. For example, grocery stores and restaurants are sometimes considered non-basic employers.

The Location Quotient (LQ) technique is the most common method of identifying basic industries for a given economy. The LQ technique compares the share of workers in each industry of a given economy with that of a larger reference economy. If the number of workers in the given economy is greater than that of the reference economy, these are considered to be basic industries because they fill needs beyond those of the reference community.

In the table above we highlight the basic industries for the region. The distribution of employment in these industries exceeds that for the United States. These basic industries represent about 5,967 employees or about 58.2% of total regional employment. These are the industries that drive the regional economy.

## Earnings by Industry

The Bureau of Labor Statistics (BLS) tracks average earnings by major industry. In the table below we present the current breakdown and rank. The data set comes from the Bureau of Labor Statistics (BLS) via Woods & Pool Economics.

Average Earnings (2012 \$)		
Industry	Earnings	Rank
Farm Employment	\$2,835	23
Forestry, Fishing, Related Activities And Other Employment	\$35,833	15
Mining Employment	\$68,907	3
Utilities Employment	\$115,000	1
Construction Employment	\$45,671	11
Manufacturing Employment	\$43,319	12
Wholesale Trade Employment	\$65,065	4
Retail Trade Employment	\$26,287	18
Transportation And Warehousing Employment	\$57,429	6
Information Employment	\$47,000	10
Finance And Insurance Employment	\$31,990	17
Real Estate And Rental And Lease Employment	\$10,570	21
Professional And Technical Services Employment	\$53,390	8
Management Of Companies And Enterprises Employment	\$56,048	7
Administrative And Waste Services Employment	\$32,284	16
Educational Services Employment	\$14,738	19
Health Care And Social Assistance Employment	\$61,504	5
Arts, Entertainment, And Recreation Employment	\$4,702	22
Accommodation And Food Services Employment	\$14,625	20
Other Services, Except Public Administration Employment	\$36,602	13
Federal Civilian Government Employment	\$85,651	2
Federal Military Employment	\$36,584	14
State And Local Government Employment	\$52,923	9
Establishment Employment	\$40,185	

Source: W&P Economics

The data suggests that Utilities is the highest paid industry averaging \$115,000 per employee. Federal Civilian Government is the second highest paid industry averaging \$85,651 per employee. Mining is the third highest paid profession averaging \$68,907 per employee. Wholesale trade is the fourth highest paid industry averaging \$65,065 per employee. Health Care and Social Assistance is the fifth highest paid category averaging \$61,504 per employee. These figures are compared with regional Average Earnings of \$40,185 per employee.

The highlighted industries represent basic industries for the region. Average earnings for these basic industries comes to \$40,306 or 0.3% higher than average for the region.

## Top Employers

The table below gives a listing of the region's top employers. The data comes from InfoUSA and includes a primary industry description for each employer.

Top Employers				
Name	Employees	SIC Code	Industry Description	Location Type
Food City Distribution Ctr	1,001	5099-98	Distribution Centers (Whls)	-
Clinch Valley Health	700	8742-42	Health Care Management	Subsidiary
Clinch Valley Med Ctr Senior	700	8051-01	Nursing & Convalescent Homes	-
Johnston Memorial Hospital	687	8062-02	Hospitals	-
Walmart Supercenter	550	5311-02	Department Stores	Branch
Ksc Consulting LLC	499	8711-06	Engineers	-
Universal Fibers Inc	450	2655-01	Fiber & Fiber Products (Mfrs)	Branch
Aerus Electrolox	400	5722-16	Vacuum Cleaners-Household-Dealers	Branch
Emory & Henry College	300	8221-01	Schools-Universities & Colleges Academic	-
Federal Pacific	300	5063-30	Electric Equipment & Supplies-Wholesale	0

Source: InfoUSA

The top employers include: (1) Food City Distribution Ctr (1001 employees); (2) Clinch Valley Health (700 employees) and; (3) Clinch Valley Med Ctr Senior (700 employees).

## Population

In this section we present population data for the region. The table and graph below show historic data between 2010 and 2021. The historic data comes from the US Census; the forecast comes from Woods & Pool Economics.

Population Forecast		
Year	Pop	Growth %
2010	28,873	
2011	28,592	-1.0%
2012	28,251	-1.2%
2013	28,070	-0.6%
2014	27,726	-1.2%
2015	27,418	-1.1%
2016	26,888	-1.9%
2017	26,430	-1.7%
2018	26,107	-1.2%
2019	25,937	-0.7%
2020	25,756	-0.7%
2021	25,577	-0.7%
2022	25,448	-0.5%
2023	25,379	-0.3%
2024	25,311	-0.3%
2025	25,242	-0.3%
2026	25,174	-0.3%

Source: US Census; W&P Economics

Population decreased from 28,873 in 2010 to 25,577 in 2021 and is anticipated to decrease to 25,174 in 2026.

## Establishment Employment

In this section we present establishment employment data for the region. The table and graph below show historic data between 2010 and 2021. The historic data comes from the Bureau of Labor Statistics (BLS); the forecast comes from Woods & Pool Economics.

Establishment Employment Forecast		
Year	Est Emp	Growth %
2010	10,285	
2011	10,121	-1.6%
2012	10,211	0.9%
2013	10,203	-0.1%
2014	10,005	-1.9%
2015	10,196	1.9%
2016	10,196	0.0%
2017	9,947	-2.4%
2018	9,866	-0.8%
2019	9,875	0.1%
2020	9,762	-1.1%
2021	9,638	-1.3%
2022	9,906	2.8%
2023	10,039	1.3%
2024	10,176	1.4%
2025	10,244	0.7%
2026	10,308	0.6%

Source: BLS; W&P Economics

Establishment employment decreased from 10,285 in 2010 to 9,638 in 2021 and is anticipated to increase to 10,308 in 2026.

## Civilian Employment

In this section we present civilian employment data for the region. The table and graph below show historic data between 2010 and 2022. The historic data comes from the Bureau of Labor Statistics (BLS); the forecast utilizes data from Woods & Pool Economics.

Year	Civ Emp	Growth %
2012	10,760	
2013	10,643	-1.1%
2014	10,434	-2.0%
2015	10,713	2.7%
2016	9,439	-11.9%
2017	9,326	-1.2%
2018	9,211	-1.2%
2019	9,292	0.9%
2020	8,906	-4.2%
2021	8,850	-0.6%
2022	9,153	3.4%
2023	9,323	1.9%
2024	9,076	-2.6%
2025	9,051	-0.3%
2026	9,027	-0.3%
2027	9,003	-0.3%
2028	8,978	-0.3%

Source: BLS; W&P Economics

Civilian employment decreased from 10,760 in 2012 to 9,153 in 2022 and is anticipated to decrease to 8,978 in 2028.

## Labor Force and Unemployment

In this section we take a look at the labor force and unemployment. The table below shows civilian employment, unemployment and labor force statistics for the region since 2010. The data set comes from the Bureau of Labor Statistics (BLS) via the Texas A&M Real Estate Center.

Year	Civ Emp	Unemp	Lab Force	Unemp Rate
2012	10,760	977	11,737	8.3%
2013	10,643	953	11,596	8.2%
2014	10,434	864	11,298	7.6%
2015	10,713	738	11,451	6.4%
2016	9,439	712	10,151	7.0%
2017	9,326	576	9,902	5.8%
2018	9,211	472	9,683	4.9%
2019	9,292	454	9,746	4.7%
2020	8,906	757	9,663	7.8%
2021	8,850	452	9,302	4.9%
2022	9,153	352	9,505	3.7%
2023	9,323	366	9,689	3.8%
2024	9,076	371	9,447	3.9%

Source: BLS; Texas A&M Real Estate Center

Unemployment decreased from 977 in 2012 to 371 in 2024. The unemployment rate decreased from 8.3% in 2012 to 3.9% in 2024.

The table and graph below show the unemployment rate for the region for the past 12 months.

Month	Unemp Rate
May-24	3.6%
Jun-24	4.0%
Jul-24	4.4%
Aug-24	4.5%
Sep-24	4.0%
Oct-24	4.0%
Nov-24	4.1%
Dec-24	3.8%
Jan-25	4.7%
Feb-25	4.5%
Mar-25	4.4%
Apr-25	4.5%
May-25	4.8%

Source: TAMU

The Unemployment Rate for the Region came in at 3.6% in May 2024 and 4.8% in May 2025.

**Building Permits**

In this section we look at building permits. The table and graph below show historical data for the region since 2000. The data set comes from the US Census.

Building Permits				
Year	1 Family	2-4 Family	5+ Family	Total
2000	58	0	0	58
2001	64	0	0	64
2002	61	4	6	71
2003	59	0	11	70
2004	74	7	0	81
2005	79	0	0	79
2006	117	4	0	121
2007	79	0	7	86
2008	34	3	0	37
2009	26	2	0	28
2010	40	3	0	43
2011	29	0	0	29
2012	24	3	0	27
2013	19	0	0	19
2014	21	0	9	30
2015	17	0	0	17
2016	21	0	0	21
2017	8	8	0	16
2018	12	0	0	12
2019	17	0	0	17
2020	18	0	0	18
2021	17	4	0	21
2022	11	0	0	11
2023	20	0	0	20
2024	15	20	0	35

Source: US Census

Building permits for the region increased from 58 in 2000 to 121 in 2006, before decreasing to 43 in 2010 and decreasing to 35 in 2024.

**Conclusion**

We anticipate moderate economic growth accompanied by modest population declines for the region over the next several years.

## DEMOGRAPHIC CHARACTERISTICS

### Population

In the table below we give the 2010-2026 Caliper Corporation population projection for the Market Area.

Population Forecast		
Year	Population	Growth %
2010	47,730	-
2011	47,818	0.2%
2012	47,906	0.2%
2013	47,994	0.2%
2014	48,082	0.2%
2015	48,170	0.2%
2016	48,257	0.2%
2017	48,345	0.2%
2018	48,433	0.2%
2019	48,521	0.2%
2020	48,609	0.2%
2021	48,697	0.2%
2022	48,785	0.2%
2023	48,874	0.2%
2024	48,962	0.2%
2025	49,051	0.2%
2026	49,140	0.2%

## Overburdened Renter Households

The following tables give overburdened renter household data for the Market Area. The data set comes from the U.S. Census Bureau.

Overburdened Renter Households	
	% of Total
<20% of Income Spent on Housing	41.8%
20-24% of Income Spent on Housing	12.0%
25-29% of Income Spent on Housing	6.9%
30-34% of Income Spent on Housing	8.5%
>35% of Income Spent on Housing	30.7%
<b>Total</b>	<b>100.0%</b>

Source: U.S. Census Bureau

Our research suggests that 30.7 percent of the renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 39.3 percent of the renter households are overburdened to 30 percent of income.

55+ Overburdened Renter Households	
	% of Total
<20% of Income Spent on Housing	34.4%
20-24% of Income Spent on Housing	15.2%
25-29% of Income Spent on Housing	7.5%
30-34% of Income Spent on Housing	7.7%
>35% of Income Spent on Housing	35.1%
<b>Total</b>	<b>100.0%</b>

Source: U.S. Census Bureau

Our research suggests that 35.1 percent of the 55+ renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 42.8 percent of the 55+ renter households are overburdened to 30 percent of income.

65+ Overburdened Renter Households	
	% of Total
<20% of Income Spent on Housing	29.5%
20-24% of Income Spent on Housing	14.3%
25-29% of Income Spent on Housing	12.4%
30-34% of Income Spent on Housing	12.8%
>35% of Income Spent on Housing	31.0%
<b>Total</b>	<b>100.0%</b>

Source: U.S. Census Bureau

Our research suggests that 31.0 percent of the 65+ renter households in this market area are overburdened, paying more than 35 percent of their income towards housing-related costs. Our research also suggests that 43.8 percent of the 65+ renter households are overburdened to 30 percent of income.

## Owner Substandard Units

The U.S. Census Bureau defines substandard housing units as follows: (1) Units without complete plumbing; or (2) Units with 1.00 or more persons per room.

The following tables give owner substandard housing unit data for occupied housing units in the nation, state, region and market area. The data comes from the U.S. Census Bureau:

Owner Substandard Units	
	% of Total
1.00 persons per room or less	97.3%
1.01 to 1.50 persons per room	0.8%
1.51 persons per room or more	0.2%
Complete Plumbing	98.3%
1.00 persons per room or less	1.7%
1.01 to 1.50 persons per room	0.0%
1.51 persons per room or more	0.0%
Lacking Complete Plumbing	1.7%
Standard	97.3%
Substandard	2.7%
Total	100.0%

Source: U.S. Census Bureau

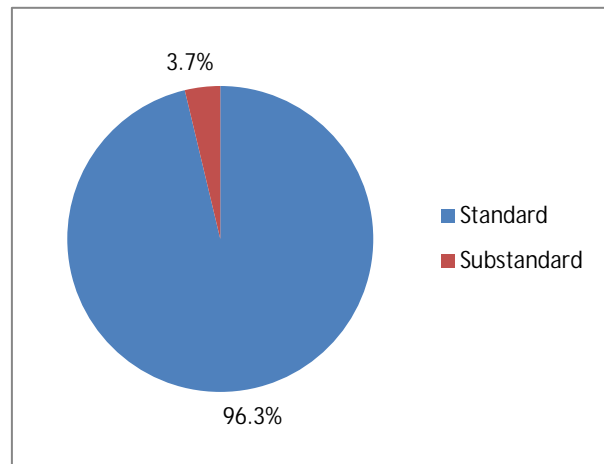

Our research suggests that 2.7 percent of occupied owner housing units in the market area are substandard.

## Renter Substandard Units

The following tables give renter substandard housing unit data for occupied housing units in the nation, state, region and market area. The data comes from the U.S. Census Bureau:

Renter Substandard Units	
	% of Total
1.00 persons per room or less	96.3%
1.01 to 1.50 persons per room	1.9%
1.51 persons per room or more	0.4%
Complete Plumbing	98.7%
1.00 persons per room or less	1.3%
1.01 to 1.50 persons per room	0.0%
1.51 persons per room or more	0.0%
Lacking Complete Plumbing	1.3%
Standard	96.3%
Substandard	3.7%
Total	100.0%

Source: U.S. Census Bureau

Our research suggests that 3.7 percent of renter owner housing units in the market area are substandard.

## Owner Movership

The following tables give owner household movership data for the market area with an estimated breakout by household size. The data comes from the U.S. Census Bureau and the American Housing Survey:

Owner Movership, by Size								
Market Area								
	1 Person	2 Person	3 Person	4 Person	5 Person	6 Person	7+ Person	Total
Owner to Owner	2.1%	3.4%	4.3%	4.3%	4.6%	5.0%	5.8%	3.6%
Owner to Renter	2.0%	1.9%	3.4%	3.2%	3.2%	4.8%	7.3%	2.6%
Owner Movership Rate	4.2%	5.2%	7.8%	7.5%	7.8%	9.8%	13.2%	6.2%

Source: U.S. Census, American Housing Survey; Allen & Associates

Our research suggests an owner movership rate of 6.2 percent.

Elderly Owner Movership, by Size								
AHS Survey								
	1 Person	2 Person	3 Person	4 Person	5 Person	6 Person	7+ Person	Total
Owner to Owner	2.0%	2.8%	2.3%	1.6%	3.1%	1.0%	3.7%	2.4%
Owner to Renter	1.7%	0.8%	1.4%	2.1%	0.6%	2.6%	0.0%	1.2%
Owner Movership Rate	3.7%	3.7%	3.7%	3.7%	3.7%	3.7%	3.7%	3.7%

Source: U.S. Census, American Housing Survey; Allen & Associates

Our research suggests an elderly owner movership rate of 3.7 percent.

## Renter Movership

The following tables give renter household movership data for the market area with an estimated breakout by household size. The data comes from the U.S. Census Bureau and the American Housing Survey:

Renter Movership, by Size								
Market Area								
	1 Person	2 Person	3 Person	4 Person	5 Person	6 Person	7+ Person	Total
Renter to Renter	7.7%	17.3%	24.4%	29.3%	29.7%	32.1%	49.6%	17.5%
Renter to Owner	1.9%	7.1%	7.2%	9.1%	10.0%	7.8%	9.2%	5.5%
Renter Movership Rate	9.6%	24.4%	31.6%	38.5%	39.7%	39.9%	58.8%	23.0%

Source: U.S. Census, American Housing Survey; Allen & Associates

Our research suggests a renter movership rate of 23.0 percent.

Elderly Renter Movership, by Size								
AHS Survey								
	1 Person	2 Person	3 Person	4 Person	5 Person	6 Person	7+ Person	Total
Renter to Renter	7.4%	6.6%	7.2%	7.6%	6.0%	7.8%	0.0%	7.1%
Renter to Owner	0.6%	1.4%	0.7%	0.4%	2.0%	0.2%	8.0%	0.9%
Renter Movership Rate	8.0%	8.0%	8.0%	8.0%	8.0%	8.0%	8.0%	8.0%

Source: U.S. Census, American Housing Survey; Allen & Associates

Our research suggests an elderly renter movership rate of 8.0 percent.

## SUPPLY ANALYSIS

In conducting our analysis, we began by attempting to compile a list of every multifamily property with 10 or more units in the market area. We included conventionally-financed multifamily communities as well as properties financed by the local housing authority and the state housing finance agency in our listing. We even included properties financed by and/or subsidized by USDA and/or HUD. Finally, we included properties that are either proposed or currently under construction. The result was a listing of projects with 10 or more units - whether existing, under construction, or proposed - for this area. Our rental property inventory listing is found in the pages that follow.

A map showing the location of the properties included in the rental property inventory is found in the pages that follow. Properties identified with red pushpins have 100 percent market rate units (market rate properties), properties identified with yellow pushpins have a mixture of market rate / restricted / subsidized units (restricted properties), and properties identified with blue pushpins have 100 percent project-based rental assistance (subsidized properties).

After accounting for any unconfirmed properties and any properties that are located outside the defined market area, we arrived at a list of confirmed market area properties. This was the listing of properties upon which our analysis is based. In our opinion, the properties included on this list give a credible picture of market conditions as of the effective date of this report. This listing is found in the pages that follow.

Our next step was to compile a master list of unrestricted market rate rent comparables from the listing of confirmed properties. We eliminated any properties which were either under construction, being renovated, in lease up, or which were unstabilized for one reason or another. We identified market rate properties of similar age and condition to the subject property. If we were unable to identify a sufficient number of market rate comparables in the market area, we included market rate properties from outside the market area. If we were still unable to identify a sufficient number of market rate comparables, we included rent restricted properties - provided, however, that the rents charged at these properties were below statutory limits and similar to the rents charged at the market rate properties in the market area (suggesting that these rent restricted properties were *de facto* market rate properties).

Finally, we compiled a master list of restricted rent comparables from the listing of confirmed properties. We used the same approach described above for unrestricted market rate properties.

The resulting master lists of rent comparables and accompanying locator maps are found in this section as well. Detailed write-ups for the properties included on these lists are found in the Appendix. We include write-ups for *all* of the rent comparables identified on our master lists, regardless of whether they ended up being selected as one of the *best* rent comparables. We did this for two reasons: (1) To be transparent; and (2) To provide the reader with context regarding our selection process.

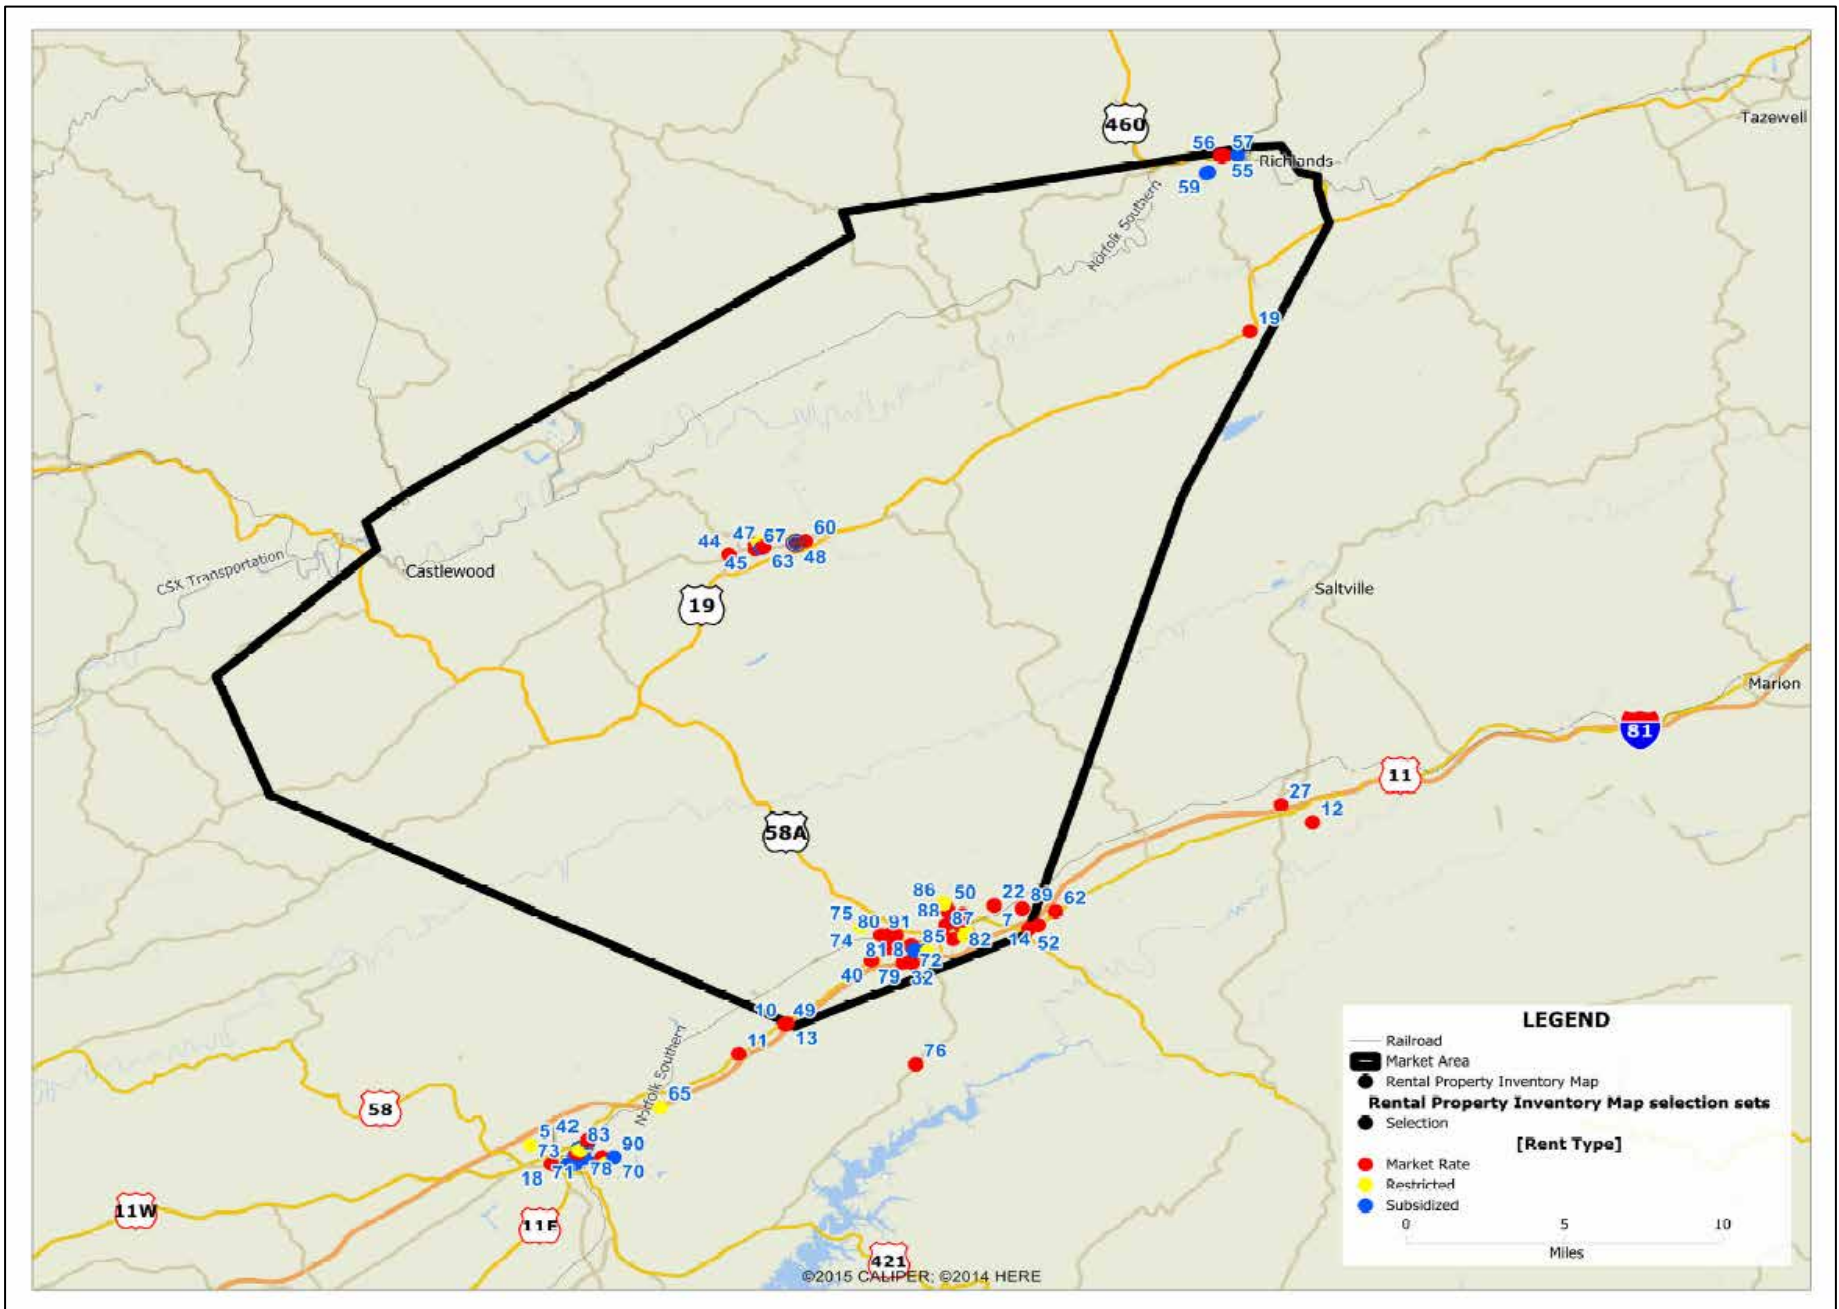

The balance of this section includes a breakdown of confirmed market area properties by rent type, project status, year built, and financing source. We also include a rent, unit mix, and amenity summary for confirmed market area properties. Finally, we provide summary of vouchers, concessions, and waiting lists for the properties included in this report.

Rental Property Inventory

Source: Allen & Associates

Our analysis includes a total of 63 confirmed market area properties consisting of 2,443 units. The occupancy rate for these units currently stands at 92 percent. This rate reflects the occupancy for all confirmed market area units, regardless of project status (stabilized, under construction, proposed, etc.).

Confirmed market area properties break down by rent type and tenure as shown in the tables above.

## Rental Property Inventory, Confirmed, Inside Market Area, by Project Status

The following tables and graphs provide a summary of the confirmed market area properties included in this analysis broken out by project status:

Occupancies of stabilized market area properties broken out by occupancy type (elderly or family) and rent type (subsidized, restricted or market rate) are found below:

Our research suggests the following occupancy levels for the 243 stabilized elderly units in this market area:

- Subsidized, 99 percent (156 units in survey)
- Restricted, 86 percent (87 units in survey)
- Market Rate, not applicable (0 units in survey)

Our research suggests the following occupancy levels for the 2,044 stabilized family units in this market area:

- Subsidized, 98 percent (731 units in survey)
- Restricted, 96 percent (297 units in survey)
- Market Rate, 96 percent (1016 units in survey)

Occupancy rates for stabilized market area properties broken out by occupancy type (elderly or family) and unit type are found below (supporting data is found in the pages that follow):

Our research suggests the following occupancy levels for the 243 stabilized elderly units in this market area:

- 0-Bedroom, 100 percent (15 units in survey)
- 1-Bedroom, 95 percent (201 units in survey)
- 2-Bedroom, 89 percent (27 units in survey)
- 3-Bedroom, not applicable (0 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Our research suggests the following occupancy levels for the 2,044 stabilized family units in this market area:

- 0-Bedroom, 63 percent (19 units in survey)
- 1-Bedroom, 98 percent (491 units in survey)
- 2-Bedroom, 96 percent (1181 units in survey)
- 3-Bedroom, 98 percent (331 units in survey)
- 4-Bedroom, 95 percent (22 units in survey)

Source: Allen & Associates

Our research suggests the following unit mix for the 296 confirmed elderly units located in this market area:

- 0-Bedroom, 5 percent (15 units in survey)
- 1-Bedroom, 86 percent (254 units in survey)
- 2-Bedroom, 9 percent (27 units in survey)
- 3-Bedroom, not applicable (0 units in survey)
- 4-Bedroom, not applicable (0 units in survey)

Our research suggests the following unit mix for the 2,147 confirmed family units located in this market area:

- 0-Bedroom, 1 percent (19 units in survey)
- 1-Bedroom, 23 percent (500 units in survey)
- 2-Bedroom, 58 percent (1,243 units in survey)
- 3-Bedroom, 17 percent (363 units in survey)
- 4-Bedroom, 1 percent (22 units in survey)

## Rental Property Inventory, Confirmed, Inside Market Area, Amenity Summary

Source: Allen & Associates

Our research suggests that 10 percent of confirmed market area properties are 1 story in height, 90 percent are 2-4 stories in height, 0 percent are 5-10 stories in height, and 0 percent are over 10 stories in height. In addition, surveyed properties benefit from the following project amenities: 11 percent have a business/computer center, 29 percent have a community center, 8 percent have a fitness center, 11 percent have a playground, and 5 percent have a sports court.

Our research also suggests that the following unit amenities are present at surveyed properties: 94 percent have blinds, 98 percent have carpeting, 68 percent have patios/balconies, and 13 percent have outside storage. Surveyed properties also include the following kitchen amenities: 100 percent have a stove, 100 percent have a refrigerator, 38 percent have a disposal, 62 percent have a dishwasher, and 8 percent have a microwave.

In addition, 89 percent of confirmed market area properties have central heat while 86 percent have central air. Our research also suggests that 98 percent of surveyed properties have open parking. A total of 44 percent of area properties have central laundry facilities, while 40 percent have washer/dryer hookups, and 17 percent have washer/dryer units in each residential unit.

A total of 10 percent of confirmed market area properties have call buttons, 5 percent have controlled access, and 3 percent have security alarms.

It is also our understanding that the majority of confirmed market area properties provide cable access.

Finally, in the following pages we provide a summary of vouchers, concessions and waiting lists for the confirmed market area properties included in this report. We also include any absorption information we have uncovered as part of our research.

## RENT COMPARABILITY ANALYSIS

In this section we develop restricted and unrestricted market rent conclusions for the subject property on an "as if complete & stabilized" basis. Our analysis begins with an evaluation of unrestricted market rents.

### **Unrestricted Rent Analysis**

In this section we develop an unrestricted market rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was an unrestricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

#### Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized market rate properties as comparables for purposes of our rent comparability analysis.

Comparables with restricted rents are used when a sufficient number of market rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

The subject property is located in an area with very few market rate elderly developments. Consequently, we have elected to use general occupancy properties in our analysis of market rents. This is appropriate because most of the existing elderly renters currently reside in general occupancy units creating a linkage between the two property types. Our research suggests that the majority of elderly renter households in the market area currently reside in general occupancy housing. This is consistent with a 1995 AARP member survey which found that 80 percent of respondents resided in general occupancy properties. Because such a high percentage of seniors reside in general occupancy housing, the subject property will need to be priced competitively to attract these renters. Consequently, it is not only appropriate - but prudent - to address general occupancy rents when determining market rents for age-restricted units in this market.

#### Rent Comparables, Market Rate, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

#### Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in an unrestricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

Rental Property Inventory, 1-Bedroom Units

Overview							Rents							
Key	Property Name	Built	Renovated	Rent Type	Occ Type	Status	Sub	30%	40%	50%	60%	70%	80%	Mkt

### Rent Adjustments

Our analysis included a property management survey and a technique known as "statistical extraction" to help us identify the best adjustments to use. Statistical extraction, which is similar to the matched pair method, helped us derive the optimal adjustments for our particular data set.

Here's a hypothetical example to illustrate how we derived our rent adjustments. Assume that property managers tell us we should expect rent adjustments ranging from \$0.00 to \$0.50 per square foot for a particular market. Next, assume that we select 25 rent comparables with an adjusted sample standard deviation (a statistical measure of variability) of \$100. We employ a square foot rent adjustment of \$0.10 for each comparable resulting in an adjusted sample standard deviation of \$90. This tells us that the assumed adjustment "explained" some of the variability in the data. We repeat this process for adjustments of \$0.20, \$0.30, \$0.40 and \$0.50 which yielded adjusted sample standard deviations of \$80, \$70, \$65 and \$75, respectively. The \$0.40 square foot adjustment "explains" the most variability because any other adjustment yields a higher adjusted sample standard deviation. Consequently, a \$0.40 rent adjustment is the best adjustment for purposes of this example. This is a simplified example because we actually adjusted for numerous variables simultaneously in our analysis.

Many adjustments (bedroom count, bathroom count and square footage) are highly interrelated. Statistical extraction helped us unravel the interrelationships between these variables. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is superior a "plus" adjustment is made. If the subject is inferior a "minus" adjustment is made.

We used the Excel Solver function to help us with our analysis. The Solver function was programmed to minimize the adjusted standard deviation for our data set. We evaluated a total of 62 variables in 22 categories (AC systems, heating systems, technology, bedrooms, bathrooms, square feet, visibility, access, neighborhood, area amenities, condition, effective age, project amenities, elevator, unit amenities, storage, kitchen amenities, parking, laundry, security, on-site management, on-site maintenance) in an effort to identify the mix of adjustments that explained the most variability found in our raw data.

A discussion of our surveyed and concluded adjustments is found below.

### *Concessions*

The first step in our analysis was to account for any concessions at the subject and the comparables. We considered the advertised street rent and concessions being offered and derived a net rent estimate for each comparable. Net rent, defined as advertised street rent minus monthly concessions, represents the cash rent paid by new residents at the various properties. This is the best measure of market value (prior to any other adjustments) for the comparables included in this analysis.

### *Tenant-Paid Utilities*

The next step in our analysis was to account for differences in tenant-paid utilities between the comparable properties and the subject. We used the HUD Utility Schedule Model to derive our adjustments. The HUD model includes a current utility rate survey for the area. In the event that the tenant-paid utilities associated with a particular property are higher or lower than the subject, adjustments were made to account for the differences. Adjustments reflect the difference between the tenant-paid utilities for the comparable property minus that for the subject.

### *Technology*

We accounted for technology (cable and internet access) offered in the rent for each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per month for cable; internet access was valued at \$0.

Adjustment	Technology		Concluded
	Survey	Range	
Cable	\$0	\$0	\$0
Internet	\$0	\$0	\$0

*Bedrooms*

Our analysis also included an adjustment for the number of bedrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$50 per bedroom.

Bedrooms			
Adjustment	Survey Range		Concluded
Bedrooms	\$50	\$200	\$50

*Bathrooms*

Our analysis also included an adjustment for the number of bathrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$25 per bathroom.

Bathrooms			
Adjustment	Survey Range		Concluded
Bathrooms	\$25	\$100	\$25

*Square Feet*

Our analysis also included an adjustment for square footage at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.85 per square foot.

Square Feet			
Adjustment	Survey Range		Concluded
Square Feet	\$0.10	\$2.00	\$0.85

*Visibility*

We also accounted for differences in visibility at each of the comparables as compared to the subject property in our analysis. Based on our field review, we assigned a visibility rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in visibility ratings between the subject and the comparables.

Visibility			
Adjustment	Survey Range		Concluded
Rating	\$0	\$50	\$0

*Access*

Our analysis also included an adjustment for access at each of the comparables as compared to the subject property. Based on our field review, we assigned an access rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in access ratings between the subject and the comparables.

Access			
Adjustment	Survey Range		Concluded
Rating	\$0	\$50	\$0

*Neighborhood*

We considered differences in neighborhood at each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local demographic and crime data (presented earlier in this report), we assigned a neighborhood rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in neighborhood ratings between the subject and the comparables.

Neighborhood			
Adjustment	Survey Range		Concluded
Rating	\$0	\$50	\$0

*Area Amenities*

We also accounted for area amenities for each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local amenity data (presented earlier in this report), we assigned a local amenity rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in amenity ratings between the subject and the comparables.

Area Amenities			
Adjustment	Survey Range		Concluded
Rating	\$0	\$50	\$0

*Median Household Income*

Our analysis also included an adjustment for median household income for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.0050 per dollar of median household income.

Median Household Income			
Adjustment	Survey Range		Concluded
Med HH Inc	\$0.0000	\$0.0050	\$0.0050

*Average Commute*

Our analysis also included an adjustment for average commute for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 per each minute of commute.

Average Commute			
Adjustment	Survey Range		Concluded
Avg Commute	\$0.00	\$0.00	\$0.00

*Public Transportation*

Our analysis also included an adjustment for the existence of public transportation within walking distance of each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 for public transportation.

Public Transportation			
Adjustment	Survey Range		Concluded
Public Trans	\$0.00	\$0.00	\$0.00

*Personal Crime*

Our analysis also included an adjustment for personal crime rates for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per 0.01 percentage points.

Personal Crime			
Adjustment	Survey Range		Concluded
Personal Crime	\$0	\$0	\$0

*Condition*

Our analysis also included an adjustment for the condition of each comparable as compared to the subject property. Based on our field review, we assigned a condition rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$10 per point for differences in condition ratings between the subject and the comparables.

Condition			
Adjustment	Survey Range		Concluded
Rating	\$10	\$50	\$10

*Effective Age*

We considered differences in effective age in our analysis. Based on our field review, we estimated the effective age for each of the properties included in this analysis. Our estimates reflected the condition-adjusted age and remaining useful life of each property. Statistical extraction resulted in an adjustment of \$5.00 per year for differences in effective age between the subject and the comparables.

Effective Age			
Adjustment	Survey Range		Concluded
Rating	\$1.00	\$5.00	\$5.00

*Project Amenities*

We considered the presence of various project amenities at the comparables as compared to the subject property. Project amenities include ball fields, BBQ areas, billiards, business/computer centers, car care centers, community centers, elevators, fitness centers, gazebos, hot tubs/Jacuzzis, horseshoe pits, lakes, libraries, movie theatres, picnic areas, playgrounds, pools, saunas, sports courts and walking trails. The survey range and our concluded adjustment for each amenity is summarized below.

Project Amenities			
Adjustment	Survey Range		Concluded
Ball Field	\$2	\$10	\$2
BBQ Area	\$2	\$10	\$2
Billiards	\$2	\$10	\$2
Bus/Comp Ctrs	\$2	\$10	\$2
Car Care Center	\$2	\$10	\$2
Community Center	\$2	\$10	\$2
Elevator	\$10	\$100	\$2
Fitness Center	\$2	\$10	\$3
Gazebo	\$2	\$10	\$2
Hot Tub/Jacuzzi	\$2	\$10	\$2
Horseshoe Pit	\$2	\$10	\$2
Lake	\$2	\$10	\$2
Library	\$2	\$10	\$2
Movie Theatre	\$2	\$10	\$2
Picnic Area	\$2	\$10	\$2
Playground	\$2	\$10	\$2
Pool	\$2	\$10	\$3
Sauna	\$2	\$10	\$2
Sports Court	\$2	\$10	\$2
Walking Trail	\$2	\$10	\$2

*Unit Amenities*

We considered the presence of various unit amenities at the comparables as compared to the subject property. Unit amenities include blinds, ceiling fans, carpeting/upgraded flooring, fireplaces, patios/balconies and storage. The survey range and our concluded adjustment for each amenity is summarized below.

Unit Amenities			
Adjustment	Survey Range		Concluded
Blinds	\$2	\$10	\$2
Ceiling Fans	\$2	\$10	\$2
Carpeting	\$2	\$10	\$2
Fireplace	\$2	\$10	\$2
Patio/Balcony	\$2	\$10	\$2
Storage	\$10	\$50	\$10

*Kitchen Amenities*

We considered the presence of various kitchen amenities at the comparables as compared to the subject property. Kitchen amenities include stoves, refrigerators, disposals, dishwashers and microwaves. The survey range and our concluded adjustment for each amenity is summarized below.

Kitchen Amenities			
Adjustment	Survey Range		Concluded
Stove	\$2	\$10	\$2
Refrigerator	\$2	\$10	\$2
Disposal	\$2	\$10	\$3
Dishwasher	\$2	\$10	\$2
Microwave	\$2	\$10	\$2

### *Parking*

We also adjusted for differing types of parking configurations. We classified parking five ways: (1) Garage, (2) Covered; (3) Assigned, (4) Open and (5) No parking offered. Statistical extraction resulted in an adjustment of \$50 per month for garages; covered parking was valued at \$20; assigned parking was valued at \$10; open parking was valued at \$0; no parking was valued at \$0.

Parking			
Adjustment	Survey Range		Concluded
Garage	\$50	\$200	\$50
Covered	\$20	\$100	\$20
Assigned	\$10	\$50	\$10
Open	\$0	\$0	\$0
None	\$0	\$0	\$0

### *Laundry*

We also evaluated differing types of laundry configurations. We classified laundry amenities three ways: (1) Central Laundry, (2) Washer/Dryer Units; and (3) Washer/Dryer Hookups. Our analysis resulted in an adjustment of \$5 per month for central laundries; washer/dryer units were valued at \$10; washer/dryer hookups were valued at \$5.

Laundry			
Adjustment	Survey Range		Concluded
Central	\$5	\$25	\$5
W/D Units	\$10	\$50	\$10
W/D Hookups	\$5	\$25	\$5

### *Security*

We considered the presence of various security amenities at the comparables as compared to the subject property. Security amenities include call buttons, controlled access, courtesy officers, monitoring, security alarms and security patrols. The survey range and our concluded adjustment for each amenity is summarized below.

Security			
Adjustment	Survey Range		Concluded
Call Buttons	\$2	\$10	\$2
Controlled Access	\$2	\$10	\$2
Courtesy Officer	\$2	\$10	\$2
Monitoring	\$2	\$10	\$2
Security Alarms	\$2	\$10	\$2
Security Patrols	\$2	\$10	\$2

Rent Conclusion, 1BR-1BA-658sf

The development of our rent conclusion for the 1BR-1BA-658sf units is found below.

Our analysis included the evaluation of a total of 18 unit types found at 5 properties. We selected the 18 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a “plus” adjustment is made. If the subject is inferior, a “minus” adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 18 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

		Rent Conclusion							
Comparable			Unadjusted Rent			Adjusted Rent			
Property-Unit Key	Property Name	Unit Type	Street Rent	Concessions	Net Rent	Gross Adjustments	Net Adjustments	Adjusted Rent	Rank
Sub-04	Main Street Villas	1BR-1BA-658sf	\$609	\$0	\$609	-	\$0	\$609	-
015-01	Cedar Ridge Apartments	1BR-1BA-450sf	\$650	\$0	\$650	\$359	\$291	\$941	4

097-07	Willow Run Apartments	3BR-2BA-1664sf	\$2,098	\$175	\$1,923	\$1,419	-\$591	\$1,332	18
	Adjusted Rent, Minimum							\$903	
	Adjusted Rent, Maximum							\$1,531	
	Adjusted Rent, Average							\$1,155	
	Adjusted Rent, Modified Average							\$1,147	
	Rent, Concluded							\$1,150	

Our analysis suggests a rent of \$1,150 for the 1BR-1BA-658sf units at the subject property.

In our opinion, the 1BR-1BA-700sf units at Mountain Empire Apartments (Property # 055), the 1BR-1BA-450sf units at Cedar Ridge Apartments (Property # 015), the 1BR-1BA-496sf units at Willow Run Apartments (Property # 097), the 1BR-1BA-576sf units at Promise Landing Apartments (Property # 067), and the 1BR-1BA-800sf units at Whites Mill Road Apartments (Property # 096) are the best comparables for the units at the subject property.

**Unrestricted Market Rent Conclusion**

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were an unrestricted property:

Unrestricted Market Rent Conclusion						
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market	Proposed	Advantage
1BR-1BA-853sf / 30% of AMI / 30% of AMI	No	Yes	3	\$1,150	\$609	47.0%
1BR-1BA-658sf / 30% of AMI / 30% of AMI	No	Yes	2	\$1,150	\$609	47.0%
1BR-1BA-658sf / 50% of AMI / 50% of AMI	No	Yes	6	\$1,150	\$609	47.0%
1BR-1BA-658sf / 60% of AMI / 60% of AMI	No	Yes	10	\$1,150	\$609	47.0%
Total / Average			21	\$1,150	\$609	47.0%

Our analysis suggests an average unrestricted market rent of \$1,150 for the subject property. This is compared with an average proposed rent of \$609, yielding an unrestricted market rent advantage of 47 percent. Overall, the subject property appears to be priced at or below unrestricted market rents for the area.

We selected a total of 5 properties as comparables for purposes of our analysis. The average occupancy at the select rent comparables currently stands at 98 percent.

Occupancy rates for the selected rent comparables are broken out below:

Occupancy Rate, Select Comparables								
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom								
1-Bedroom								98%
2-Bedroom								
3-Bedroom								
4-Bedroom								
Total								98%

Occupancy rates for all stabilized market area properties are broken out below:

Occupancy Rate, Stabilized Properties								
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom	100%							63%
1-Bedroom	99%			85%	100%		91%	97%
2-Bedroom	98%			93%	95%		91%	96%
3-Bedroom	100%			97%	97%			97%
4-Bedroom	95%							
Total	98%			91%	96%		91%	96%

HUD conducts an annual rent survey to derive Fair Market Rent estimates for an area. Based on this, 2-bedroom rents for the area grew from \$714 to \$914 since 2010. This represents an average 4.7% annual increase over this period.

Fair market rent data for the area is found below:

HUD Fair Market Rents						
Year	Rent			Change		
	1BR	2BR	3BR	1BR	2BR	3BR
2020	\$542	\$714	\$890	2.5%	2.5%	2.5%
2021	\$532	\$701	\$872	-1.8%	-1.8%	-2.0%
2022	\$534	\$702	\$868	0.4%	0.1%	-0.5%
2023	\$602	\$793	\$972	12.7%	13.0%	12.0%
2024	\$720	\$905	\$1,138	19.6%	14.1%	17.1%
2025	\$676	\$851	\$1,044	-6.1%	-6.0%	-8.3%
2026	\$748	\$914	\$1,156	10.7%	7.4%	10.7%

## **Restricted Rent Analysis**

In this section we develop a restricted market rent conclusion and an achievable rent conclusion for the subject property units. Our analysis began by selecting comparable rentals to use to develop estimates of market rents for the units at the subject property, assuming that the subject was a restricted property. Our selection of comparables was based on location, age, condition, unit mix and amenities of the comparable properties relative to the subject property.

### Rental Property Inventory, by Unit Type

In the following pages we present an inventory of properties included in this analysis. Rents for these properties, broken out by unit type, were used in selecting the rent comparables used in this analysis.

The properties that we consider to be comparable to the subject property are highlighted in the tables found in the following pages. We attempted to select stabilized restricted rent properties as comparables for purposes of our rent comparability analysis.

Comparables with market rents are used when a sufficient number of restricted rent comparables are not available and when maximum allowable rents for properties with restricted rents exceed prevailing rents in the area. In the event that program rental rates exceed market rental rates, restricted units are, in fact, *de facto* market rate units.

The subject property is located in an area with very few market rate elderly developments. Consequently, we have elected to use general occupancy properties in our analysis of market rents. This is appropriate because most of the existing elderly renters currently reside in general occupancy units creating a linkage between the two property types. Our research suggests that the majority of elderly renter households in the market area currently reside in general occupancy housing. This is consistent with a 1995 AARP member survey which found that 80 percent of respondents resided in general occupancy properties. Because such a high percentage of seniors reside in general occupancy housing, the subject property will need to be priced competitively to attract these renters. Consequently, it is not only appropriate - but prudent - to address general occupancy rents when determining market rents for age-restricted units in this market.

### Rent Comparables, Restricted Rent, Map

A map showing the location of the properties selected as comparables in this analysis is found in the following pages. Properties identified with red pushpins have market rents, properties identified with yellow pushpins have restricted rents, and properties identified with blue pushpins have subsidized rents. Detailed write-ups for the select rent comparables are found in the Appendix to this report.

### Rent Comparability Grids

Our analysis employed the use of rent comparability grids and resulted in a restricted market rent estimate for each of the subject's unit types. These grids and a narrative describing our rent adjustments are found in the following pages.

Rental Property Inventory, 1-Bedroom Units

Overview							Rents							
Key	Property Name	Built	Renovated	Rent Type	Occ Type	Status	Sub	30%	40%	50%	60%	70%	80%	Mkt
012	Bristol Residential	1925	2006	Restricted	Elderly	Stabilized				\$615

### Rent Adjustments

Our analysis included a property management survey and a technique known as "statistical extraction" to help us identify the best adjustments to use. Statistical extraction, which is similar to the matched pair method, helped us derive the optimal adjustments for our particular data set.

Here's a hypothetical example to illustrate how we derived our rent adjustments. Assume that property managers tell us we should expect rent adjustments ranging from \$0.00 to \$0.50 per square foot for a particular market. Next, assume that we select 25 rent comparables with an adjusted sample standard deviation (a statistical measure of variability) of \$100. We employ a square foot rent adjustment of \$0.10 for each comparable resulting in an adjusted sample standard deviation of \$90. This tells us that the assumed adjustment "explained" some of the variability in the data. We repeat this process for adjustments of \$0.20, \$0.30, \$0.40 and \$0.50 which yielded adjusted sample standard deviations of \$80, \$70, \$65 and \$75, respectively. The \$0.40 square foot adjustment "explains" the most variability because any other adjustment yields a higher adjusted sample standard deviation. Consequently, a \$0.40 rent adjustment is the best adjustment for purposes of this example. This is a simplified example because we actually adjusted for numerous variables simultaneously in our analysis.

Many adjustments (bedroom count, bathroom count and square footage) are highly interrelated. Statistical extraction helped us unravel the interrelationships between these variables. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is superior a "plus" adjustment is made. If the subject is inferior a "minus" adjustment is made.

We used the Excel Solver function to help us with our analysis. The Solver function was programmed to minimize the adjusted standard deviation for our data set. We evaluated a total of 62 variables in 22 categories (AC systems, heating systems, technology, bedrooms, bathrooms, square feet, visibility, access, neighborhood, area amenities, condition, effective age, project amenities, elevator, unit amenities, storage, kitchen amenities, parking, laundry, security, on-site management, on-site maintenance) in an effort to identify the mix of adjustments that explained the most variability found in our raw data.

A discussion of our surveyed and concluded adjustments is found below.

### *Concessions*

The first step in our analysis was to account for any concessions at the subject and the comparables. We considered the advertised street rent and concessions being offered and derived a net rent estimate for each comparable. Net rent, defined as advertised street rent minus monthly concessions, represents the cash rent paid by new residents at the various properties. This is the best measure of market value (prior to any other adjustments) for the comparables included in this analysis.

### *Tenant-Paid Utilities*

The next step in our analysis was to account for differences in tenant-paid utilities between the comparable properties and the subject. We used the HUD Utility Schedule Model to derive our adjustments. The HUD model includes a current utility rate survey for the area. In the event that the tenant-paid utilities associated with a particular property are higher or lower than the subject, adjustments were made to account for the differences. Adjustments reflect the difference between the tenant-paid utilities for the comparable property minus that for the subject.

### *Technology*

We accounted for technology (cable and internet access) offered in the rent for each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per month for cable; internet access was valued at \$0.

Adjustment	Technology		Concluded
	Survey	Range	
Cable	\$0	\$0	\$0
Internet	\$0	\$0	\$0

*Bedrooms*

Our analysis also included an adjustment for the number of bedrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$50 per bedroom.

Bedrooms			
Adjustment	Survey Range		Concluded
Bedrooms	\$50	\$200	\$50

*Bathrooms*

Our analysis also included an adjustment for the number of bathrooms at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$25 per bathroom.

Bathrooms			
Adjustment	Survey Range		Concluded
Bathrooms	\$25	\$100	\$25

*Square Feet*

Our analysis also included an adjustment for square footage at each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.10 per square foot.

Square Feet			
Adjustment	Survey Range		Concluded
Square Feet	\$0.10	\$2.00	\$0.10

*Visibility*

We also accounted for differences in visibility at each of the comparables as compared to the subject property in our analysis. Based on our field review, we assigned a visibility rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in visibility ratings between the subject and the comparables.

Visibility			
Adjustment	Survey Range		Concluded
Rating	\$0	\$50	\$0

*Access*

Our analysis also included an adjustment for access at each of the comparables as compared to the subject property. Based on our field review, we assigned an access rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in access ratings between the subject and the comparables.

Access			
Adjustment	Survey Range		Concluded
Rating	\$0	\$50	\$0

*Neighborhood*

We considered differences in neighborhood at each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local demographic and crime data (presented earlier in this report), we assigned a neighborhood rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in neighborhood ratings between the subject and the comparables.

Neighborhood			
Adjustment	Survey Range		Concluded
Rating	\$0	\$50	\$0

*Area Amenities*

We also accounted for area amenities for each of the comparables as compared to the subject property in our analysis. Based on our field review and our evaluation of local amenity data (presented earlier in this report), we assigned a local amenity rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$0 per point for differences in amenity ratings between the subject and the comparables.

Area Amenities			
Adjustment	Survey Range		Concluded
Rating	\$0	\$50	\$0

*Median Household Income*

Our analysis also included an adjustment for median household income for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.0050 per dollar of median household income.

Median Household Income			
Adjustment	Survey Range		Concluded
Med HH Inc	\$0.0000	\$0.0050	\$0.0050

*Average Commute*

Our analysis also included an adjustment for average commute for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 per each minute of commute.

Average Commute			
Adjustment	Survey Range		Concluded
Avg Commute	\$0.00	\$0.00	\$0.00

*Public Transportation*

Our analysis also included an adjustment for the existence of public transportation within walking distance of each of the comparables as compared to the subject property. Statistical extraction resulted in an adjustment of \$0.00 for public transportation.

Public Transportation			
Adjustment	Survey Range		Concluded
Public Trans	\$0.00	\$0.00	\$0.00

*Personal Crime*

Our analysis also included an adjustment for personal crime rates for the area in which each of the comparables is located as compared to the subject property. Statistical extraction resulted in an adjustment of \$0 per 0.01 percentage points.

Personal Crime			
Adjustment	Survey Range		Concluded
Personal Crime	\$0	\$0	\$0

*Condition*

Our analysis also included an adjustment for the condition of each comparable as compared to the subject property. Based on our field review, we assigned a condition rating for each of the properties included in this analysis. Our ratings ranged from 1 to 5 with 1 being the worst and 5 being the best. Statistical extraction resulted in an adjustment of \$10 per point for differences in condition ratings between the subject and the comparables.

Condition			
Adjustment	Survey Range		Concluded
Rating	\$10	\$50	\$10

*Effective Age*

We considered differences in effective age in our analysis. Based on our field review, we estimated the effective age for each of the properties included in this analysis. Our estimates reflected the condition-adjusted age and remaining useful life of each property. Statistical extraction resulted in an adjustment of \$1.00 per year for differences in effective age between the subject and the comparables.

Effective Age			
Adjustment	Survey Range		Concluded
Rating	\$1.00	\$5.00	\$1.00

*Project Amenities*

We considered the presence of various project amenities at the comparables as compared to the subject property. Project amenities include ball fields, BBQ areas, billiards, business/computer centers, car care centers, community centers, elevators, fitness centers, gazebos, hot tubs/Jacuzzis, horseshoe pits, lakes, libraries, movie theatres, picnic areas, playgrounds, pools, saunas, sports courts and walking trails. The survey range and our concluded adjustment for each amenity is summarized below.

Project Amenities			
Adjustment	Survey Range		Concluded
Ball Field	\$2	\$10	\$2
BBQ Area	\$2	\$10	\$2
Billiards	\$2	\$10	\$2
Bus/Comp Ctrs	\$2	\$10	\$2
Car Care Center	\$2	\$10	\$2
Community Center	\$2	\$10	\$2
Elevator	\$10	\$100	\$10
Fitness Center	\$2	\$10	\$2
Gazebo	\$2	\$10	\$2
Hot Tub/Jacuzzi	\$2	\$10	\$2
Horseshoe Pit	\$2	\$10	\$2
Lake	\$2	\$10	\$2
Library	\$2	\$10	\$2
Movie Theatre	\$2	\$10	\$2
Picnic Area	\$2	\$10	\$2
Playground	\$2	\$10	\$2
Pool	\$2	\$10	\$2
Sauna	\$2	\$10	\$2
Sports Court	\$2	\$10	\$2
Walking Trail	\$2	\$10	\$2

*Unit Amenities*

We considered the presence of various unit amenities at the comparables as compared to the subject property. Unit amenities include blinds, ceiling fans, carpeting/upgraded flooring, fireplaces, patios/balconies and storage. The survey range and our concluded adjustment for each amenity is summarized below.

Unit Amenities			
Adjustment	Survey Range		Concluded
Blinds	\$2	\$10	\$2
Ceiling Fans	\$2	\$10	\$2
Carpeting	\$2	\$10	\$2
Fireplace	\$2	\$10	\$2
Patio/Balcony	\$2	\$10	\$2
Storage	\$10	\$50	\$10

*Kitchen Amenities*

We considered the presence of various kitchen amenities at the comparables as compared to the subject property. Kitchen amenities include stoves, refrigerators, disposals, dishwashers and microwaves. The survey range and our concluded adjustment for each amenity is summarized below.

Kitchen Amenities			
Adjustment	Survey Range		Concluded
Stove	\$2	\$10	\$2
Refrigerator	\$2	\$10	\$2
Disposal	\$2	\$10	\$2
Dishwasher	\$2	\$10	\$2
Microwave	\$2	\$10	\$2

### *Parking*

We also adjusted for differing types of parking configurations. We classified parking five ways: (1) Garage, (2) Covered; (3) Assigned, (4) Open and (5) No parking offered. Statistical extraction resulted in an adjustment of \$50 per month for garages; covered parking was valued at \$20; assigned parking was valued at \$10; open parking was valued at \$0; no parking was valued at \$0.

Parking			
Adjustment	Survey Range		Concluded
Garage	\$50	\$200	\$50
Covered	\$20	\$100	\$20
Assigned	\$10	\$50	\$10
Open	\$0	\$0	\$0
None	\$0	\$0	\$0

### *Laundry*

We also evaluated differing types of laundry configurations. We classified laundry amenities three ways: (1) Central Laundry, (2) Washer/Dryer Units; and (3) Washer/Dryer Hookups. Our analysis resulted in an adjustment of \$5 per month for central laundries; washer/dryer units were valued at \$10; washer/dryer hookups were valued at \$5.

Laundry			
Adjustment	Survey Range		Concluded
Central	\$5	\$25	\$5
W/D Units	\$10	\$50	\$10
W/D Hookups	\$5	\$25	\$5

### *Security*

We considered the presence of various security amenities at the comparables as compared to the subject property. Security amenities include call buttons, controlled access, courtesy officers, monitoring, security alarms and security patrols. The survey range and our concluded adjustment for each amenity is summarized below.

Security			
Adjustment	Survey Range		Concluded
Call Buttons	\$2	\$10	\$2
Controlled Access	\$2	\$10	\$2
Courtesy Officer	\$2	\$10	\$2
Monitoring	\$2	\$10	\$2
Security Alarms	\$2	\$10	\$2
Security Patrols	\$2	\$10	\$2

Rent Conclusion, 1BR-1BA-658sf

The development of our rent conclusion for the 1BR-1BA-658sf units is found below.

Our analysis included the evaluation of a total of 18 unit types found at 5 properties. We selected the 18 most comparable units to utilize as rent comparables for purposes of this analysis. A write-up for each of the properties included in this analysis is found in the Appendix.

Our analysis included the adjustments developed in the previous section. Adjustments represent dollar amounts by which the subject property varies from the comparable properties. If the subject is better, a “plus” adjustment is made. If the subject is inferior, a “minus” adjustment is made. In the table below, we summarize the adjustments and the resulting indicated rent for the top 18 comparables included in this analysis. The units that we consider most comparable are highlighted for the reader's reference.

Rent Conclusion

073-04	Sapling Grove Apartments	2BR-1BA-985sf	\$475	\$0	\$475	\$318	\$116	\$591	10
	Adjusted Rent, Minimum					\$578			
	Adjusted Rent, Maximum					\$1,060			
	Adjusted Rent, Average					\$798			
	Adjusted Rent, Modified Average					\$796			
	Rent, Concluded					\$725			

Our analysis suggests a rent of \$725 for the 1BR-1BA-658sf units at the subject property.

In our opinion, the 1BR-1BA-750sf units at Ridgefield Court Apartments (Property # 071), the 1BR-1BA-659sf units at Eastridge Apartments (Property # 024), the 1BR-1BA-776sf units at Sapling Grove Apartments (Property # 073), the 1BR-1BA-589sf units at Highland View Apartments (Property # 037), and the 1BR-1BA-1166sf units at Bristol Residential (Property # 012) are the best comparables for the units at the subject property.

Restricted Market Rent Conclusion

Based on our evaluation of the rents at the select comparable properties, and considering the location, quality and amenities of the subject property, we conclude the following market rents for the subject property units, assuming that the subject were a restricted property:

Restricted Market Rent Conclusion				
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Market
1BR-1BA-853sf / 30% of AMI / 30% of AMI	No	Yes	3	\$725
1BR-1BA-658sf / 30% of AMI / 30% of AMI	No	Yes	2	\$725
1BR-1BA-658sf / 50% of AMI / 50% of AMI	No	Yes	6	\$725
1BR-1BA-658sf / 60% of AMI / 60% of AMI	No	Yes	10	\$725
Total / Average			21	\$725

Our analysis suggests an average restricted market rent of \$725 for the subject property.

We selected a total of 5 properties as comparables for purposes of our analysis. The average occupancy at the select rent comparables currently stands at 95 percent.

The occupancy rate of the selected rent comparables is broken out in the tables below:

Occupancy Rate, Select Comparables								
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom								
1-Bedroom	100%			76%	100%		91%	
2-Bedroom								
3-Bedroom								
4-Bedroom								
Total	100%			76%	100%		91%	

Occupancy rates for all stabilized market area properties are broken out below:

Occupancy Rate, Stabilized Properties								
	Subsidized	20% of AMI	30% of AMI	40% of AMI	50% of AMI	60% of AMI	80% of AMI	Market
0-Bedroom	100%							63%
1-Bedroom	99%			85%	100%		91%	97%
2-Bedroom	98%			93%	95%		91%	96%
3-Bedroom	100%			97%	97%			97%
4-Bedroom	95%							
Total	98%			91%	96%		91%	96%

Rents at rent restricted properties tend to move with median household incomes for an area. Given HUD's published median incomes, we were able to derive 1, 2 and 3-bedroom 60% of AMI rent limits for the subject's primary market area. According to our analysis, maximum 2-bedroom rents for the area grew from \$609 to \$852 since 2010. This represents an average 4.4% annual increase over this period.

Maximum tax credit rent data for the area is found below:

Maximum Tax Credit Rents, 60% of AMI						
Year	Rent			Change		
	1BR	2BR	3BR	1BR	2BR	3BR
2015	\$507	\$609	\$704	2.4%	2.5%	2.6%
2016	\$502	\$602	\$696	-1.0%	-1.1%	-1.1%
2017	\$562	\$675	\$780	12.0%	12.1%	12.1%
2018	\$569	\$683	\$789	1.2%	1.2%	1.2%
2019	\$624	\$749	\$866	9.7%	9.7%	9.8%
2020	\$630	\$756	\$874	1.0%	0.9%	0.9%
2021	\$600	\$720	\$831	-4.8%	-4.8%	-4.9%
2022	\$609	\$730	\$844	1.5%	1.4%	1.6%
2023	\$710	\$852	\$984	16.6%	16.7%	16.6%

**Achievable Rent Conclusion**

The next step in our analysis is to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering market rents, program rent limits, and any other applicable rent restrictions on the subject property.

Our analysis begins by establishing the applicable program rent limits for the subject property. Program rent limits include any applicable LIHTC and FMR rent limits. LIHTC rent limits typically apply to units benefitting from tax credit and/or bond financing. The LIHTC rent limits for applicable units at the subject property follow:

LIHTC Rent Limits						
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	Utilities	Net Rent
1BR-1BA-853sf / 30% of AMI / 30% of AMI	No	Yes	3	\$463	\$105	\$358
1BR-1BA-658sf / 30% of AMI / 30% of AMI	No	Yes	2	\$463	\$105	\$358
1BR-1BA-658sf / 50% of AMI / 50% of AMI	No	Yes	6	\$772	\$105	\$667
1BR-1BA-658sf / 60% of AMI / 60% of AMI	No	Yes	10	\$927	\$105	\$822
Total / Average			21	\$772	\$105	\$667

Our analysis suggests an average net LIHTC rent limit of \$667 for 21 applicable units at the subject property.

FMR rent limits typically apply to units benefitting from HOME funds. The FMR rent limits for applicable units at the subject property follow:

FMR Rent Limits						
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Gross Rent	Utilities	Net Rent
1BR-1BA-853sf / 30% of AMI / 30% of AMI	No	Yes	-	-	-	-
1BR-1BA-658sf / 30% of AMI / 30% of AMI	No	Yes	-	-	-	-
1BR-1BA-658sf / 50% of AMI / 50% of AMI	No	Yes	-	-	-	-
1BR-1BA-658sf / 60% of AMI / 60% of AMI	No	Yes	-	-	-	-
Total / Average			-	-	-	-

HOME funding is not proposed for the subject property.

Units benefitting exclusively from tax credits and/or bond financing are subject to LIHTC rent limits. Units benefitting from HOME funds in addition to tax credit and/or bond financing are subject to the lesser of LIHTC rent limits or FMR rent limits. Units benefitting from project-based rental assistance are normally limited to unrestricted market rent. With these parameters in mind, the following table sets forth the concluded program rent limits for applicable units at the subject property:

Program Rent Limits							
Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	LIHTC	FMR	Market	Program
1BR-1BA-853sf / 30% of AMI / 30% of AMI	No	Yes	3	\$358	-	\$1,150	\$1,150
1BR-1BA-658sf / 30% of AMI / 30% of AMI	No	Yes	2	\$358	-	\$1,150	\$1,150
1BR-1BA-658sf / 50% of AMI / 50% of AMI	No	Yes	6	\$667	-	\$1,150	\$1,150
1BR-1BA-658sf / 60% of AMI / 60% of AMI	No	Yes	10	\$822	-	\$1,150	\$1,150
Total / Average			21	\$667	-	\$1,150	\$1,150

Our analysis suggests an average program rent limit of \$1,150 for 21 applicable units at the subject property.

Now that we have established program rent limits, we are in a position to develop an achievable rent conclusion for the subject property. Achievable rents represent the absolute highest rent permissible for the area, considering unrestricted and restricted market rents, program rent limits, and any other applicable rent restrictions on the subject property. The following table summarizes our findings:

Achievable Rents

Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Program	Unrestricted	Restricted	Achievable	Proposed	Advantage
1BR-1BA-853sf / 30% of AMI / 30% of AMI	No	Yes	3	\$1,150	\$1,150	\$725	\$1,150	\$609	47.0%
1BR-1BA-658sf / 30% of AMI / 30% of AMI	No	Yes	2	\$1,150	\$1,150	\$725	\$1,150	\$609	47.0%
1BR-1BA-658sf / 50% of AMI / 50% of AMI	No	Yes	6	\$1,150	\$1,150	\$725	\$1,150	\$609	47.0%
1BR-1BA-658sf / 60% of AMI / 60% of AMI	No	Yes	10	\$1,150	\$1,150	\$725	\$1,150	\$609	47.0%
Total / Average			21	\$1,150	\$1,150	\$725	\$1,150	\$609	47.0%

Our analysis suggests an average achievable rent of \$1,150 for the subject property. This is compared with an average proposed rent of \$609, yielding an achievable rent advantage of 47 percent. Overall, the subject property appears to be priced at or below achievable rents for the area.

Finally, assuming no rent subsidies, we arrive at the following achievable rents for units at this property:

Achievable Rents, No Rent Subsidies

Unit Type / Income Limit / Rent Limit	HOME	Subsidized	Units	Program	Unrestricted	Restricted	Achievable	Proposed	Advantage
1BR-1BA-853sf / 30% of AMI / 30% of AMI	No	No	3	\$358	\$1,150	\$725	\$358	\$609	-70.1%
1BR-1BA-658sf / 30% of AMI / 30% of AMI	No	No	2	\$358	\$1,150	\$725	\$358	\$609	-70.1%
1BR-1BA-658sf / 50% of AMI / 50% of AMI	No	No	6	\$667	\$1,150	\$725	\$667	\$609	8.7%
1BR-1BA-658sf / 60% of AMI / 60% of AMI	No	No	10	\$822	\$1,150	\$725	\$725	\$609	16.0%
Total / Average			21	\$667	\$1,150	\$725	\$621	\$609	1.9%

## DEMAND ANALYSIS

### Overview

In this section we evaluate demand for the subject property using the recommended demand methodology promulgated by the National Council of Housing Market Analysts (NCHMA). For purposes of this analysis, we define demand as the number of 65+ income-qualified renter households (by household size and unit type) that would qualify to live at the subject property at the lesser of the developer's proposed rents or achievable rents.

Our analysis begins by developing a breakdown of the number of renter households, by income, by size as of the date of market entry for this development. This breakdown, which utilizes demographic data presented earlier in this report, is presented below:

2025 \$		65+ Renter Households, by Income, by Size							
Min	Max	2025							
		1 Person	2 Person	3 Person	4 Person	5 Person	6+ Person	Total	
\$0	to \$9,999	258	58	12	2	5	3	337	
\$0	to \$19,999	568	87	31	3	11	5	705	
\$0	to \$29,999	773	207	52	8	14	5	1,058	
\$0	to \$39,999	821	272	84	11	16	5	1,208

\$0	or more	1,032	331	151	24	58	13	1,608	

Source: ESRI & Ribbon Demographics

Our analysis includes an estimate of demand along with capture rate and penetration rate estimates. Capture rates were computed two ways: (1) On a gross basis (the number of proposed units divided by qualified demand) and (2) On a net basis (the number of proposed units divided by qualified demand minus competing & pipeline units). Penetration rates are defined as the number of proposed units plus competing & pipeline units divided by income-qualified demand. In the following pages we provide detailed listings of competing & pipeline units in the market area broken by unit type.

Competing & Pipeline Units, 1-Bedroom Units

Key Property Name	Overview					Total Units									Vacant Units							
	Built	Renovated	Rent Type	Occ Type	Status	Sub	30%	40%	50%	60%	70%	80%	Mkt	Sub	30%	40%	50%	60%	70%	80%	Mkt

## Demand Estimate, 1-Bedroom, Subsidized, 60% of AMI

In this section we estimate demand for the 1-Bedroom / Subsidized / 60% of AMI units at the subject property. Our analysis assumes a total of 21 units, 21 of which are anticipated to be vacant on market entry in 2025. Our analysis assumes a 50% income qualification ratio and 2-person households.

Unit Details	
Target Population	65+ Households
Unit Type	1-Bedroom
Rent Type	Subsidized
Income Limit	60% of AMI
Total Units	21
Vacant Units at Market Entry	21

Minimum Qualified Income	
Net Rent	\$0
Utilities	\$105
Gross Rent	\$105
Income Qualification Ratio	50%
Minimum Qualified Income	\$210
Months/Year	12
Minimum Qualified Income	\$2,520

65+ Renter Households, by Income, by Size								
2025								
2025	\$	1 Person	2 Person	3 Person	4 Person	5 Person	6+ Person	
\$0	to	\$9,999	258	58	12	2	5	3

Subtotal	730	254	0	0	0	0

Demand Estimate 984

Our analysis suggests demand for a total of 984 size- and income-qualified units in the market area.

Please note: This unit-level demand estimate does not account for income band overlap with other units. Project-level demand estimates taking these factors into consideration will be developed later.

## Demand Estimate, Subsidized

In this section we account for income-band overlap and develop a demand estimate for the subsidized units at the subject property.

65+ Renter Households, by Income, by Size								
2025								
2025	\$	1 Person	2 Person	3 Person	4 Person	5 Person	6+ Person	
\$0	to	\$9,999	258	58	12	2	5	3
\$0	to	\$19,999	568	87	31	3	11	5

Demand Estimate

984

Our analysis suggests demand for a total of 984 size- and income-qualified units in the market area.

Please note: This demand estimate does not account for income band overlap at the project level. A demand estimate taking this into consideration will be developed later.

## Demand Estimate, Project-Level

In this section we account for income-band overlap and develop a project-level demand estimate for the subject property.

65+ Renter Households, by Income, by Size								
2025								
2025	\$	1 Person	2 Person	3 Person	4 Person	5 Person	6+ Person	
\$0	to	\$9,999	258	58	12	2	5	3
\$0	to	\$19,999	568	87	31	3	11	5
\$0	to	\$29,999	773	207	52	8	14	5
\$0	to	\$39,999	821	272	84	11	16	5
\$0	to	\$49,999	886	277	95	12	24	6
\$0	to	\$59,999	906	286	101	14	35	9

Subtotal	730	254	0	0	0	0	

Demand Estimate

984

Our analysis suggests project-level demand for a total of 984 size- and income-qualified units in the market area.

## Capture Rates

In this section, we summarize our demand conclusions and estimate the capture rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

Subject Property Units (Total)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	21								21
2BR									
3BR									
4BR									
Tot	21								21

Subject Property Units (Vacant at Market Entry)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	21								21
2BR									
3BR									
4BR									
Tot	21								21

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

Gross Demand									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	984								984
2BR									
3BR									
4BR									
Tot	984								984

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by gross demand. Underwriters often utilize capture rate limits of 10 to 25 percent using this methodology. Our estimates are presented below:

Capture Rates (Subject Property Units / Gross Demand)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	2.1%								2.1%
2BR									
3BR									
4BR									
Tot	2.1%								2.1%

The next step in our analysis is to tabulate the number of vacant competing & pipeline units in the market area by

unit/income type. This information will be used to further refine our capture rate estimate for the subject property. A table showing the distribution of vacant competing & pipeline units is found below.

Vacant Competing & Pipeline Units									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	23								23
2BR									
3BR									
4BR									
Tot	23								23

The next step in our analysis is to subtract the number of vacant competing & pipeline units from gross demand to arrive at a net demand estimate for the subject property units. As described earlier, unit-level net demand estimates are found in the body of the chart found below; project-level net demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level net demand may not add up to project-level net demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level net demand.

Net Demand (Gross Demand - Vacant Competing & Pipeline Units)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	961								961
2BR									
3BR									
4BR									
Tot	961								961

The next step in our analysis is to compute the capture rate for the project. For purposes of this computation, we define capture rate as the number of subject property units divided by net demand. A capture rate in excess of 20 percent is considered excessive using this methodology. Our estimates are presented below:

Capture Rates (Subject Property Units / Net Demand)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	2.2%								2.2%
2BR									
3BR									
4BR									
Tot	2.2%								2.2%

In our opinion, the estimated project-level capture rate suggests an appropriate number of units for the subject property. The unit level capture rates suggest an appropriate mix of units for the subject property.

## Penetration Rates

In this section, we summarize our demand conclusions and estimate the penetration rate for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

Subject Property Units (Total)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	21								21
2BR									
3BR									
4BR									
Tot	21								21

Subject Property Units (Vacant at Market Entry)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	21								21
2BR									
3BR									
4BR									
Tot	21								21

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Unit-level demand estimates are found in the body of the chart found below; project-level demand estimates are found in the column and row totals.

Please note: Because of income-band overlap, unit-level demand may not add up to project-level demand. The overlap, which was quantified in the demand estimates presented earlier, has been accounted for in our estimates of project-level demand.

Gross Demand									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	984								984
2BR									
3BR									
4BR									
Tot	984								984

The next step in our analysis is to tabulate the number of competing & pipeline units in the market area by unit/income type. This information will be used to derive our penetration rate estimate for the subject property. A table showing the distribution of competing & pipeline units is found below.

Competing & Pipeline Units									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	194								194
2BR									
3BR									
4BR									
Tot	194								194

The next step in our analysis is to compute inclusive supply for the market area by unit/income type. Inclusive

supply will be taken into account in our penetration rate estimate for the subject property. For purposes of this estimate, inclusive supply consists of vacant subject property units plus competing & pipeline units.

Inclusive Supply (Subject Property Units + Competing & Pipeline Units)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	215								215
2BR									
3BR									
4BR									
Tot	215								215

The next step in our analysis is to compute the penetration rate for the project. For purposes of this computation, penetration rate is defined as inclusive supply divided by gross demand. A penetration rate in excess of 100 percent is considered excessive using this methodology. Our estimates are presented below:

Penetration Rates (Inclusive Supply / Gross Demand)									
	Sub	30%	40%	50%	60%	70%	80%	Mkt	Tot
0BR									
1BR	21.8%								21.8%
2BR									
3BR									
4BR									
Tot	21.8%								21.8%

In our opinion, the estimated project-level penetration rate suggest an appropriate number of units for the subject property. The unit-level penetration rates suggest an appropriate mix of units for the subject property.

## Absorption Period

In this section, we estimate the absorption period for the subject property. Our analysis begins by summarizing the estimated number of vacant subject property units on the date of market entry.

Subject Property Units (Total)								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	21							
2BR								
3BR								
4BR								

Subject Property Units (Vacant at Market Entry)								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	21							
2BR								
3BR								
4BR								

The next step in our analysis is to summarize the demand conclusions derived previously. For purposes of this analysis, we define demand as age- and income- qualified renter households for each of the unit types proposed at the subject property. Our analysis uses the unit-level demand estimates derived previously.

Gross Demand								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	984							
2BR								
3BR								
4BR								

The next step in our analysis is to apply an annual growth & movership rate to derive an annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

Annual Growth & Movership Rate	
Growth	1.9%
Movership	8.0%
Total	9.8%

Growth & Movership Estimate								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	97							
2BR								
3BR								
4BR								

The next step in our analysis is to account for secondary market area migration in our annual rental household growth & movership estimate for the market area. Our estimates are found in the tables below.

Secondary Market Area	
	40%

Growth & Movership Estimate

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	161							
2BR								
3BR								
4BR								

The next step in our analysis is to estimate fair share, or the proportion of growth and movership that we would expect the subject property to capture. The fair share analysis is used extensively in single-family, multifamily, commercial, and retail market studies. The books entitled Market Analysis for Valuation Appraisals (1994, Appraisal Institute) and Market Analysis and Highest & Best Use (2005, Appraisal institute) provide a good overview of this technique and its application to a variety of property types.

Based on our review of the subject and competing properties, along with their relative conditions/locations, we arrive at the following fair share estimates for the various unit/income types at the subject property.

Competing Properties

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR	1							
1BR	6			3				
2BR				3				
3BR								
4BR								

Fair Share

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	50.0%							
2BR								
3BR								
4BR								

Applying the concluded fair share estimates to annual growth & movership and dividing by twelve yields the following monthly absorption rate estimates for the various unit/income types at the subject property.

Monthly Absorption Rate Estimate

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	6.7							
2BR								
3BR								
4BR								

The next step in our analysis is to estimate stabilized occupancy by unit/income type for the subject property. These estimates, which were based on data previously presented in the supply analysis and rent comparability analysis sections of this report, are found below.

Rental Property Inventory, Confirmed, Inside Market Area, Elderly, Stabilized Occupancy

	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR	100%							
1BR	99%			85%				
2BR				89%				
3BR								
4BR								

Occupancy Rate, Select Comparables								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	100%			76%	100%		91%	98%
2BR								
3BR								
4BR								

Concluded Stabilized Occupancy Rate								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	97%							
2BR								
3BR								
4BR								

Applying the stabilized occupancy rate estimates to the number of vacant subject property units at market entry, yields the number of occupied units by unit/income type at stabilization as set forth below.

Occupied Units at Stabilization								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	20							
2BR								
3BR								
4BR								

Dividing the number of occupied units at stabilization by the monthly absorption rate yields an absorption period estimate by unit/income type for the various units at the subject property. Underwriters often utilize absorption period limits of 12 to 18 months for projects similar to the subject property. Our absorption period estimates are found below.

Absorption Period (Months to Stabilization)								
	Sub	30%	40%	50%	60%	70%	80%	Mkt
0BR								
1BR	3							
2BR								
3BR								
4BR								

Our analysis suggests that the subject property will stabilize at 97 percent occupancy. We estimate 3 months of absorption and an average absorption rate of 6.7 units per month for this project. In our opinion, the absorption period suggests an appropriate number and mix of units for the subject property.

Absorption rates for age-restricted multifamily properties depend on a variety of factors: (1) The competitive environment in which the property resides; (2) The pricing of the subject property units relative to competing units, (3) The presence of rent or income restrictions at the subject property; and (4) The availability of any rent concessions or rental assistance at the subject property. Subsidized elderly properties normally lease up at a rate of 12-16 units per month. Unsubsidized elderly properties with rent and income restrictions typically fill at a rate of 4-8 units per month. Market rate elderly properties normally lease up at a rate of 8-12 units per month.

As part of our analysis, we inquired about the absorption history for every property we surveyed. The following list summarizes our findings:

Key	Project	Built	Renovated	Rent Type	Occ Type	Tot Units	Abs
037	Highland View Apartments	1983	2013	Restricted	Family	44	44.0
070	Ridgecrest Town Apartments	2008	na	Restricted	Family	72	62.0

## Absorption Analysis

In this section, we analyze the anticipated lease up for the subject property. We begin our analysis by taking the the absorption period conclusions from the previous section and restating them graphically as illustrated below.

Our analysis suggests that the subject property will achieve 70 percent occupancy in 2 months, 80 percent occupancy in 2 months, and 90 percent occupancy in 2 months. We anticipate that the subject property will stabilize at 97 percent occupancy in 3 months.

It is important to note that this analysis does not account for pent-up demand, pre-leasing efforts or rent concessions. In our opinion, an effective pre-leasing effort could result in a month-for-month reduction in the estimated absorption period for this project. In addition, any concessions or rent subsidies not accounted for already in this analysis could cut capture rates and absorption periods significantly.

**RENT COMPARABLES, MARKET RATE**

Sapling Grove Apartments is an existing multifamily development located at 802 Oakview Avenue in Bristol, Virginia. The property, which consists of 26 apartment units, was originally constructed in 2008. This property is currently operated as a rent restricted property. The property currently stands at 100 percent occupancy.

## STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

- The title to the subject property is merchantable, and the property is free and clear of all liens and encumbrances, except as noted.
- No liability is assumed for matters legal in nature.
- Ownership and management are assumed to be in competent and responsible hands.
- No survey has been made by the appraiser. Dimensions are as supplied by others and are assumed to be correct.
- The report was prepared for the purpose so stated and should not be used for any other reason.
- All direct and indirect information supplied by the owner and their representatives concerning the subject property is assumed to be true and accurate.
- No responsibility is assumed for information supplied by others and such information is believed to be reliable and correct. This includes zoning and tax information provided by Municipal officials.
- The signatories shall not be required to give testimony or attend court or be at any governmental hearing with respect to the subject property unless prior arrangements have been made with the client.
- Disclosure of the contents of this report is governed by the By-Laws and Regulations of the Appraisal Institute.
- The legal description is assumed to be accurate.
- This report specifically assumes that there are no site, subsoil, or building contaminants present resulting from residual substances or construction materials, such as asbestos, radon gas, PCB, etc. Should any of these factors exist, the appraiser reserves the right to review these findings, review the value estimates, and change the estimates, if deemed necessary.
- The Americans with Disabilities Act (ADA) became effective January 26, 1992. We have not made a specific compliance survey and analysis of this property to determine whether or not it is in conformity with
- This analysis specifically assumes that the subject property is operated as described in this report.
- This analysis specifically assumes that the subject property is constructed/rehabilitated as described in this report.
- This analysis specifically assumes that the subject property is financed as described in this report.
- This analysis specifically assumes the timing set forth in this report.

## CERTIFICATION

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of the appraisal.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Uniform Standards of Professional Appraisal Practice.
- I made a personal inspection of the property that is the subject of this report.
- No one provided significant real property appraisal assistance to the person signing this certification. Debbie Rucker (Allen & Associates Consulting) assisted in compiling the data used in this report.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute.
- The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- As of the date of this report, I have completed the Standards and Ethics Education Requirements for Members of the Appraisal Institute.
- I am presently licensed in good standing as a Certified General Real Estate Appraiser in the states of Delaware, Maryland, North Carolina, and Virginia, allowing me to appraise all types of real estate.

Respectfully submitted:

ALLEN & ASSOCIATES CONSULTING, INC.

Jeff Carroll

## NCHMA MARKET STUDY INDEX

**Introduction:** Members of the National Council of Housing Market Analysts provide the following checklist referencing various components necessary to conduct a comprehensive market study for rental housing. By completing the following checklist, the NCHMA Analyst certifies that he or she has performed all necessary work to support the conclusions included within the comprehensive market study. By completion of this checklist, the analyst asserts that he/she has completed all required items per section.

<b>Executive Summary</b>		
1	Executive Summary	Executive Summary
<b>Scope of Work</b>		
2	Scope of Work	Letter of Transmittal
<b>Project Description</b>

## Current Activities

### President | Allen & Associates Consulting, Inc. | Charlotte, NC | 2000 - present

Founder of Allen & Associates Consulting, a real estate advisory firm specializing in workforce and affordable housing. Practice areas include low-income housing tax credits, tax-exempt bond transactions, HUD assisted and financed multifamily, USDA-RD assisted and financed properties, public housing, historic tax credits, conventional multifamily, and factory-built housing. Services include development consulting, feasibility studies, market analysis, rent comparability studies, appraisals, capital needs assessments, and utility studies. Performed over 4000 development consulting assignments in 46 states since 2000. Related certifications and designations:

- Mr. Carroll is a peer-reviewed member of the National Council of Housing Market Analysts (NCHMA), where he served on the Executive Committee and chaired the Data and Ethics Committees.
- Mr. Carroll is a certified general appraiser, licensed to appraise real estate in the states of Delaware, Maryland, North Carolina, and Virginia. Mr. Carroll is also a designated member of the Appraisal Institute (MAI).
- Mr. Carroll holds a BS in Engineering from Clemson University and has conducted over 2000 multifamily energy studies using the HUD Utility Schedule Model. In addition, Mr. Carroll is also a REM/Rate and an Ekotrope modeler, having received training through the Myers-Lawson School of Construction at Virginia Tech. Mr. Carroll has successfully completed the Air Conditioning Contractors of America Manual J, Manual D, ACCA Standard 5 Quality Installation courses.

### President | Tartan Residential, Inc. | Charlotte, NC | 1997 - present

Founder of Tartan Residential, a firm specializing in the development of workforce housing utilizing structural insulated exterior wall panels. Panelization delivers cost savings/benefits that put newly-constructed units within reach for workforce housing renters. Major projects include:

- Buchanan's Crossing Subdivision - A 40-unit duplex development serving families in Kansas City, Kansas. The estimated cost of this three-phase project is \$11.0 million. This mixed income project, targeting families between 50% and 80% of area median income, is financed with a mixture of conventional debt, conventional equity, and tax credit equity. Construction commenced in 2016.
- Davidson's Landing - A 115-unit garden apartment community serving families in Kansas City, Kansas. The cost of this project was \$26 million. This workforce housing development project, which targets families between 30% and 80% of area median income, was financed with tax-exempt bonds. Construction commenced in 2021 during COVID and the global supply chain crisis. The project was completed ahead of schedule and below budget in early 2023. Davidson's Landing won the 2024 SIPA Excellence in Building Award in the multifamily category
- Johnston Farms - A proposed 120-unit apartment community serving families in Rock Hill, South Carolina. The estimated cost of this project is \$31 million. This workforce housing development project, which targets families between 50% and 80% of area median income, is proposed to be financed with HUD 221d4 financing. Construction to begin in 2025.

### Manager | Multifamily Building Systems LLC | Charlotte, NC | 2019 - present

Founder of Multifamily Building Systems LLC, a firm dedicated to the construction and operation of energy-efficient multifamily properties. MBS brings together building scientists, engineers, and specialty

contractors to design, construct, and monitor high-performance buildings. Through the careful selection and sourcing of critical components, MBS helps owners maximize the returns on their multifamily investments.

Co-Founder | Workforce Housing Development Corporation, Inc. | Charlotte, NC | 2019 - present

Co-Founder and non-voting Advisory Board Member of the Workforce Housing Development Corporation, a 501c3 non-profit dedicated to the construction, finance, and operation of workforce housing. Participating projects are positioned to deliver a triple bottom line return (financial, social, environmental) to investors. Major projects include:

- Provided \$450,000 in financing for a bond-financed multifamily development in 2021.
- Secured a tax-exemption for a rental workforce housing development resulting in a \$36 million tax-exempt bond inducement in 2022.
- Developed an intern program known as Workforce Housing University. Hosted 3 interns in 2022 introducing them to the development, construction, management, and finance of rental workforce housing.
- Co-created the HousingThink podcast, a program dedicated to analyzing and discussing the nation's affordable and workforce housing crisis.
- Developed an exchange program for 4 workforce housing developments with a twofold purpose: (1) to notify participating employers of vacant units at participating developments, and (2) to notify residents at participating developments of job openings with participating employers.
- Establishing a training incentive program for residents at participating developments seeking to work in manufacturing, the trades, and other select professions.
- Developing a comprehensive set of planning tools for workforce housing developers to utilize in land use, zoning, and entitlement matters.

## **Prior Experience**

Co-Founder | Delphin Properties LLC | Charlotte, NC | 1998 - present

Co-founder of Delphin Properties, a firm specializing in the acquisition and development of manufactured home communities. This entity is currently inactive. Major projects included:

- Crystal Lakes - A 338-unit manufactured home community serving seniors in Fort Myers, Florida. Purchased the partially-constructed development in 1998, completed construction, and sold it in 2001 for a \$1 million profit.
- Mahler's Glen - A 348-unit development originally planned as a manufactured home community serving families in Garner, North Carolina. Secured zoning and site plan approval, engineered the property (including a private wastewater treatment facility), and sold it to a national homebuilder in 2000 for a \$2 million profit.
- Beacon Wood - A 363-unit development originally planned as a manufactured home community serving families in Crockery Township, Michigan. Secured zoning and site plan approval, engineered the property, and sold it to a regional homebuilder in 2001 for a \$1 million profit.

Development Director | Clayton, Williams & Sherwood, Inc. | Austin, TX | 1995 - 1997

Development Director for Clayton, Williams & Sherwood, a privately-owned operator of manufactured home communities and apartment complexes. Managed the construction and lease-up of two apartment communities consisting of 564 units and valued at \$38 million. Each property leased up in excess of 25 units per month. Put together development plans for 4 landlease manufactured home communities

consisting of 1800 units and valued at \$54 million. Put together development plans for 2 fee simple modular home subdivisions consisting of 200 units and valued at \$20 million.

Assistant to the President | Southwest Property Trust | Dallas, TX | 1993 - 1995

Assistant to the President for Southwest Property Trust, a large apartment REIT. Provided support to management personnel operating a 12,000-unit apartment portfolio.

Investment Analyst/Manager | GE Capital | Dallas, TX | 1991 - 1993

Investment Analyst/Manager for GE Capital's Residential Construction Lending business. Assisted in the management of a \$500 million investment portfolio including 30 single family residential land development investments and 70 single family construction lines of credit.

Regional Manager | Clayton, Williams & Sherwood, Inc. | Newport Beach, CA | 1989 - 1991

Regional Manager for Clayton, Williams & Sherwood, a privately-owned operator of manufactured home communities and apartment complexes. Managed a 1200-unit apartment portfolio valued at over \$72 million. Implemented a portfolio-wide 10 percent rent increase while cutting operating expenses 3 percent resulting in a \$7 million increase in portfolio value. Managed a 1200-unit manufactured home community portfolio valued at over \$36 million. Implemented a 15 percent rent increase in a 500-unit community resulting in a \$4 million increase in property value.

Manufacturing Management | Milliken & Company | Pendleton, SC | 1983 - 1986

Manufacturing Manager for Milliken & Company, a specialty textile manufacturer headquartered in Spartanburg, South Carolina. Assigned to a dyeing and finishing facility. Exposed to a wide range of manufacturing issues: facility layout, purchasing, scheduling, material handling, automation, process improvement, quality control, inventory management, logistics, personnel, safety, environmental, and customer service.

## **Education**

Harvard Business School | MBA, General Management, Real Estate, Economics | 1986 - 1988

Graduated in 1988 with an MBA from Harvard Business School. Emphasis in General Management and Real Estate with a minor concentration in Economics.

Clemson University | BS, Engineering, Economics | 1978 - 1983

Graduated in 1983 with a BS in Engineering from Clemson University. Minor concentration in Economics. Honors included Dean's List and Alpha Lambda Delta honorary. Elected officer for Phi Delta Theta social fraternity. Awarded scholarship on Clemson's varsity wrestling team.

## **Affiliations**

Mr. Carroll is a member of the Harvard Real Estate Alumni Organization, the HBS Real Estate Alumni Association, and the North Carolina Building Performance Association.

## **Specialties**

Specialties include workforce and affordable housing, low-income housing tax credits, tax-exempt bond transactions, development, development consulting, land use, zoning, entitlements, structured real estate investments, multifamily, manufactured housing, modular construction, panelization, HVAC system design, and manufacturing management.
